What is the Youth Risk Behavior Survey?

The Youth Risk Behavior Survey (YRBS) was designed to measure health risk behaviors, such as smoking, drinking and driving, and obesity, among the nation's youth. Developed by the United States Centers for Disease Control and Prevention (CDC) in Atlanta, Georgia, the 87-item, multiple-choice YRBS questionnaire was tested and revised several times prior to implementation to assure that results would be both accurate and useful. The survey has been used nationally, at a statewide level, and locally.

During February, 2002, usable YRBS questionnaires were completed by 610 seventh through twelfth grade students throughout Izard County public schools. The information provided by those students is presented in this report.

Why did Izard County conduct the YRBS?

Izard County was selected by the Arkansas Department of Health (ADH) to participate in Hometown Health Improvement (HHI), a new community health assessment project. Izard County HHI is working to assess the specific health needs of Izard County residents. In order to collect information on the health behaviors of the community's youth, HHI coalition members requested that the Youth Risk Behavior Survey be administered to the students in the seventh through twelfth grades at IzardCounty schools.

The YRBS will help Izard County identify students' current health and safety habits so that improvements can be made where needed. Healthy lifestyles for Izard County students mean longer, more productive lives for the county's young people, as well as improved learning in the classroom.

The 2001-2002 YRBS also provides Izard County with measures for evaluating future trends in health habits of youth. Survey results can now serve as a valuable tool, particularly for legislators, policy makers, school administrators, and teachers as they make decisions about new disease-prevention and health-promotion policies, services, programs, and educational activities. Parents and students can use these results to evaluate potential changes toward better health. Specifically, YRBS' findings form a valuable base upon which Izard County can strengthen its ability to:

- Establish disease prevention and health promotion policies;
- Plan and implement programs and services;

2001-2002 Izard County Youth Risk Behavior Survey

- Secure funding for programs;
- Allocate limited resources toward targeted needs and priorities;
- Conduct future research and note progress or deficiencies, and
- Enact laws to prevent injuries and unnecessary deaths.

How was the YRBS conducted?

During February, 2002, seventh through twelfth grade students enrolled in Izard County public schools completed the YRBS. All students who attended school on the day that their school administered the test to their grade were eligible to participate, but their participation was voluntary. The following Izard County schools' students participated in the survey:

- Melbourne
- Calico Rock
- Mt Pleasant
- Izard County Consolidated

About This Report

This report entitled "2001-2002 Izard County Youth Risk Behavior Survey" summarizes the overall answers Izard County's students reported about safety, diet and exercise, alcohol, tobacco, and other health risk behaviors. Izard County's survey of public schools provides a "snapshot" of students' behaviors. The survey contains questions related to:

- Behaviors that result in intentional and unintentional injuries;
- Tobacco use;
- Alcohol and other drug use;
- Sexual behaviors that result in HIV infection, other sexually-transmitted diseases (STD's), and unintentional pregnancies; and
- Physical activity and nutrition.

2001-2002 Izard County Youth Risk Behavior Survey

This report summarizes Izard County's findings on the priority health risks that result in the most significant causes of death and disability of youth in Arkansas. Written for concerned educators, policy makers, parents, and youth, this YRBS report provides a brief overview of:

- The survey's process and procedures;
- Survey questions;
- Students' answers;
- Percentage of YRBS participants giving those answers; and
- Major summary findings.

How Results Can Be Interpreted

Izard County's 2001-2002 Youth Risk Behavior Survey is a "snapshot in time" showing those health-risk behaviors reported by Izard County students in February, 2002. Answers in this survey were only as accurate as students' reporting. Each student interpreted the terms in each question according to his or her own definitions. For instance, is a pocketknife a "weapon?" What area does "on school property" include? Some students chose not to answer certain questions, meaning that not all students surveyed were represented in every response. Answers were edited for consistency using the Center for Disease Control and Prevention's YRBS data editing guidelines. For example, if a student reported that he or she had driven under the influence of alcohol, but reported that he or she had never had a drink of alcohol, the answers for those questions were deleted from the survey. Additionally, some students chose not to answer certain questions.

The percentages presented in this report were rounded to the nearest whole percent. For example, 75.5% would be reported as 76%, while 75.4% would be reported as 75%. Due to this rounding, total percentages may add up to 99% or 101%.

2001-2002 Izard County Youth Risk Behavior Survey

Sincere Appreciation To:

- The superintendents, principals, counselors, nurses, and teachers of Izard County schools who so graciously gave of their time and energy to see this survey through to its completion;
- The Izard County students who completed the YRBS questionnaires;
- The United States Centers for Disease Control and Prevention, Division of Adolescent and School Health's Surveillance Research Section, which developed the survey process and questionnaire;
- Gary Ragen and the ADH Division of Emergency Medical Services for scanning the survey forms;
- Kathleen Courtney and the Arkansas Department of Education for support and assistance with this project.

Interested individuals may request additional information. Researchers and professional wanting to build upon Izard County's 2001-2002 YRBS data may request additional data from:

2001-2002 Izard County Youth Risk Behavior Survey

Summary of Behaviors Relating to School Property

Percentage of students who:

Key Findings

The following summaries highlight Izard County students' responses on the Youth Risk Behavior Survey in key areas and provide an overview of Izard County students' current activities which impact their health.

Behaviors that Result in Injuries

- Of the students who had ridden a motorcycle during the 12 months prior to the survey, 55% said they rarely or never wore a helmet. Ninety-four percent of the students who had ridden a bicycle in the year prior to the survey indicated that they never or rarely wore a helmet.
- Twenty-nine percent of the students surveyed said that during the previous month they had ridden in a vehicle driven by someone who had been drinking alcohol. Eleven indicated they had driven a vehicle after drinking alcohol during the past 30 days.
- Thirty-three percent of students carried a weapon such as a gun, knife, or club in the past 30 days, and 13% carried a weapon on school property during that time.
- During the 12 months preceding the survey, 40% of the students had been in a physical fight one or more times. Of those students who had been in a physical fight, 8% had to be treated for injuries sustained while fighting.
- Twelve percent of the students surveyed reported they had been hit, slapped, or physically hurt on purpose by a boyfriend or girlfriend at least once during their lives.
- Seven percent of the students indicated being forced to have sexual intercourse when they did not want to at least once during their lives.

Depression and Suicide

- Thirty percent of students indicated they had felt so sad or hopeless for two weeks or longer that they stopped doing some of their usual activities.
- During the 12 months before being surveyed, 22% of students had seriously considered attempting suicide, 17% had made a plan about how they would attempt suicide, and 10% actually attempted to commit suicide. Two percent of students surveyed reported they were treated by a doctor or nurse for an injury, overdose, or poisoning resulting from a suicide attempt.

2001-2002 Izard County Youth Risk Behavior Survey

Tobacco Use

- Sixty-five percent of the students surveyed said they had tried smoking a cigarette. Thirty-two percent reported smoking cigarettes on one or more of the past 30 days. Of the students who smoked during the past month, 74% said they usually smoked two or more cigarettes on the days they smoked, and 23% said they usually got their own cigarettes by purchasing them at a store. Sixty-one percent of the student smokers who purchased cigarettes in a store in the month before the survey were not asked to show proof of age when they purchased cigarettes.
- Eighteen percent of the students had used chewing tobacco or snuff on one or more of the past 30 days, and 9% had used it on school property.
- Eleven percent of the students surveyed indicated they had smoked cigars, cigarillos, or little cigars at least once during the previous month.

Alcohol and Other Drug Use

- Seventy-three percent of the students surveyed indicated they had at least one drink of alcohol other than just a few sips at least once during their lives, and 38% had taken their first drink by the age of 13.
- Forty-one percent of the students had taken at least one drink of alcohol in the month before the survey, and 28% had five or more drinks in a row, that is, within a couple of hours, on one or more of the past 30 days.
- Thirty-one percent of the students said they had used marijuana at least once during their lives. Sixteen percent said they had smoked marijuana at least once during the last month.
- Nineteen percent said they had sniffed glue, breathed the contents of aerosol spray cans, or inhaled any paints or sprays to get high at least once during their lives. Eight percent had done so during the past month.
- Nine percent of the students surveyed had tried methamphetamines, 3% tried heroin, and 6% had tried cocaine at least once during their lives. Three percent had used a needle to inject an illegal drug into their bodies at least once.
- Seven percent of the students surveyed had taken steroid pills or shots without a doctor's prescription.

2001-2002 Izard County Youth Risk Behavior Survey

Sexual Activity

- Forty-one percent of the students who completed the survey said they had sexual intercourse. Thirteen percent of the students reported having four or more sexual partners during their lifetimes. Of the students who had sexual intercourse, 25% had used drugs or alcohol before their last sexual encounter, and 62% used a condom the last time they had sex.
- Four percent of the students surveyed reported that they had ever been or gotten someone pregnant.

Dietary Behaviors

- Twenty-five percent of the students surveyed were overweight, as measured by Body Mass Index. The Body Mass Index, or BMI, is a ratio of weight to height that allows people of different heights to be compared.
- While only 25% of the students are considered overweight as measured by BMI, 35% of the students perceived themselves as slightly to very overweight, and 50% reported that they were trying to lose weight.
- Forty-four percent of the students ate less during the past 30 days to lose or keep from gaining weight, and 60% exercised, 6% vomited or took laxatives, 13% took diet pills, and 16% went without eating for 24 hours or more to lose weight or keep from gaining weight.

Physical Activity

- Sixty-three percent of the students surveyed said they had participated in a physical activity for at least 30 minutes that made them sweat and breathe hard on three or more of the past 7 days. Forty percent said they participated in a physical activity for at least 30 minutes on three or more days during the past week which did not make them sweat or breathe hard.
- Forty-seven percent of the students attended a physical education (PE) class at least once during an average school week, and 54% said they had played on one or more sports teams during the past year.

2001-2002 Izard County Youth Risk Behavior Survey

■ Vehicle Safety

These questions measure the frequency with which students take safety precautions when riding in a motor vehicle, riding a motorcycle or a bicycle.

Percentage of students who never or rarely wore a seat belt when riding in a car driven by someone else.

Of students who rode a motorcycle during the past 12 months, the percentage who never or rarely wore a helmet.

2001-2002 Izard County Youth Risk Behavior Survey

Of students who rode a bicycle during the past 12 months, the percentage who never or rarely wore a bicycle helmet.

■ Vehicle Safety – Drinking and Driving

These questions measure the frequency with which students ride as a passenger or driver in a motor vehicle operated under the influence of alcohol.

Percentage of students who during the past 30 days rode one or more times in a car or other vehicle driven by someone who had been drinking alcohol.

2001-2002 Izard County Youth Risk Behavior Survey

Percentage of students who during the past 30 days drove a car or other vehicle one or more times when they had been drinking alcohol.

■ Violence-Related Behaviors

These questions measure violence-related behaviors.

Percentage of students who carried a weapon* on one or more of the past 30 days.

* such as a gun, knife, or club

2001-2002 Izard County Youth Risk Behavior Survey

Percentage of students who carried a gun on one or more of the past 30 days.

Percentage of students who did not go to school on one or more of the past 30 days because they felt unsafe at school or on their way to or from school.

2001-2002 Izard County Youth Risk Behavior Survey

■ Violence – Physical Fighting

These questions measure the frequency and severity of physical fights.

Percentage of students who were in a physical fight one or more times during the past 12 months.

Of students who had been in a physical fight in the past 12 months, the percentage who had to be treated by a doctor or nurse one or more times.

2001-2002 Izard County Youth Risk Behavior Survey

■ Violence – Sexual Violence

These questions measure rape and domestic violence.

Percentage of students who were hit, slapped, or physically hurt on purpose by a boyfriend or girlfriend.

Percentage of students who have ever been forced to have sexual intercourse when they did not want to.

2001-2002 Izard County Youth Risk Behavior Survey

■ Depression and Suicide

These questions measure depression, suicide, suicide attempts, and the seriousness of those attempts.

Percentage of students who felt so sad or hopeless for two weeks or longer that they stopped doing some of their usual activities.

Percentage of students who seriously considered attempting suicide during the past 12 months.

2001-2002 Izard County Youth Risk Behavior Survey

Percentage of students who made a plan about how they would attempt suicide during the past 12 months.

Percentage of students who actually attempted suicide one or more times during the past 12 months.

2001-2002 Izard County Youth Risk Behavior Survey

Percentage of students who attempted suicide during the past 12 months resulting in injury, poisoning or overdose that had to be treated by a doctor or nurse.

2001-2002 Izard County Youth Risk Behavior Survey

■ Tobacco Use – Cigarette Smoking

These questions measure smoking experimentation, current smoking patterns, age of initiation and attempt to quit smoking cigarettes.

Percentage of students who ever tried cigarette smoking, even one or two puffs.

Percentage of students who smoked a whole cigarette for the first time before age 13.

2001-2002 Izard County Youth Risk Behavior Survey

Percentage of students who smoked cigarettes on one or more of the past 30 days.

Of the students who smoked during the past 30 days, the percentage who smoked two or more cigarettes per day on the days they smoked.

2001-2002 Izard County Youth Risk Behavior Survey

Of students who smoked during the past 30 days, percentage who usually got their own cigarettes by buying them in a store or gas station during the past 30 days.

Of the students who have smoked regularly, the percentage who ever tried to quit smoking cigarettes.

2001-2002 Izard County Youth Risk Behavior Survey

■ Tobacco Use – Smokeless Tobacco

This question measures smokeless tobacco use.

Percentage of students who used chewing tobacco or snuff on one or more of the past 30 days.

■ Tobacco Use – Cigar

This question measures cigar smoking.

Percentage of students who smoked cigars, cigarillos, or little cigars during the past 30 days.

2001-2002 Izard County Youth Risk Behavior Survey

■ Alcohol Use

These questions measure frequency of alcohol use, age of initiation of drinking, and heavy drinking.

Percentage of students who had at least one drink of alcohol on one or more days during their life.

Percentage of students who had their first drink of alcohol other than a few sips before age 13.

2001-2002 Izard County Youth Risk Behavior Survey

Percentage of students who had at least one drink of alcohol on one or more of the past 30 days.

Percentage of students who had five or more drinks of alcohol in a row, that is, within a couple of hours, on one or more of the past 30 days.

2001-2002 Izard County Youth Risk Behavior Survey

■ Drug Use

These questions measure the frequency of illegal drug use.

Percentage of students who used marijuana one or more times during their life.

Percentage of students who tried marijuana for the first time before age 13.

2001-2002 Izard County Youth Risk Behavior Survey

Percentage of students who used marijuana one or more times during the past 30 days.

Percentage of students who sniffed glue, breathed the contents of aerosol spray cans or inhaled any paints or sprays to get high during their life.

2001-2002 Izard County Youth Risk Behavior Survey

Percentage of students who sniffed glue, breathed the contents of aerosol spray cans or inhaled any paints or sprays to get high during the past 30 days.

Percentage of students who used methamphetamines one or more times during their life.

2001-2002 Izard County Youth Risk Behavior Survey

Percentage of students who used heroin one or more times during their life.

Percentage of students who took steroid pills or shots without a doctor's prescription one or more times during their life.

2001-2002 Izard County Youth Risk Behavior Survey

■ Sexual Activity

These questions measure the prevalence of sexual activity, number of sexual partners, age of first intercourse and alcohol and drug use related to sexual activity.

Percentage of students who have had sexual intercourse.

Percentage of students who had sexual intercourse for the first time before age 13.

2001-2002 Izard County Youth Risk Behavior Survey

Percentage of students who had sexual intercourse with four or more people during their life.

Percentage of students who had sexual intercourse during the past three months.

2001-2002 Izard County Youth Risk Behavior Survey

Of those who had sexual intercourse, the percentage who drank alcohol or used drugs before last sexual intercourse.

■ Contraception

These questions measure use of contraception and identify whether a student has been pregnant or gotten someone pregnant.

Of students who had sexual intercourse, the percentage who used a condom during the last sexual intercourse.

2001-2002 Izard County Youth Risk Behavior Survey

Percentage of students who had been or gotten someone pregnant one or more times.

2001-2002 Izard County Youth Risk Behavior Survey

■ AIDS, HIV, & STDs

This question measures whether students have received HIV information at school.

Percentage of students who were ever taught about AIDS or HIV infection in school.

2001-2002 Izard County Youth Risk Behavior Survey

■ Obesity

These questions measure self-perception of and efforts to modify body weight, including behaviors that may lead to eating disorders and other health problems.

Percentage of students who are overweight, as calculated by Body Mass Index.

Percentage of students who describe themselves as slightly or very overweight.

2001-2002 Izard County Youth Risk Behavior Survey

Percentage of students who were trying to lose weight.

Percentage of students who ate less food, fewer calories, or foods low in fat to lose weight or to keep from gaining weight during the past 30 days.

2001-2002 Izard County Youth Risk Behavior Survey

Percentage of students who exercised to lose weight or to keep from gaining weight during the past 30 days.

Percentage of students who vomited or took laxatives to lose weight or to keep from gaining weight during the past 30 days.

2001-2002 Izard County Youth Risk Behavior Survey

Percentage of students who took diet pills to lose weight or to keep from gaining weight during the past 30 days.

Percentage of students who fasted, or went without eating, for 24 hours or more to lose weight or to keep from gaining weight during the past 30 days.

2001-2002 Izard County Youth Risk Behavior Survey

■ Nutrition

These questions measure food choices.

Percentage of students who ate fruit four or more times during the past 7 days.

Percentage of students who drank fruit juices four or more times during the past 7 days.

2001-2002 Izard County Youth Risk Behavior Survey

Percentage of students who ate green salad four or more times during the past 30 days.

Percentage of students who ate potatoes four or more times during the past 30 days.

2001-2002 Izard County Youth Risk Behavior Survey

Percentage of students who ate carrots four or more times during the past 7 days.

Percentage of students who ate other vegetables four or more times during the past 7 days.

2001-2002 Izard County Youth Risk Behavior Survey

Percentage of students who drank milk four or more times during the past 7 days.

2001-2002 Izard County Youth Risk Behavior Survey

■ Physical Activity

These questions measure students' physical activity, including team sports, physical education class, and sports injuries.

Percentage of students who participated in a physical activity for at least 30 minutes that made them sweat and breathe hard on 3 or more of the past 7 days.

Percentage of students who participated in a physical activity for at least 30 minutes that did not make them sweat or breathe hard 3 or more of the past 7 days.

2001-2002 Izard County Youth Risk Behavior Survey

Percentage of students who exercised to strengthen or tone their muscles on three or more of the past seven days.

Percentage of students who attended physical education (PE) class one or more days during an average school week.

2001-2002 Izard County Youth Risk Behavior Survey

Percentage of students who played on one or more sports teams during the past 12 months.

2001-2002 Izard County Youth Risk Behavior Survey

■ Violence-Related Behaviors at School

These questions measure violence related behaviors at school.

Percentage of students who carried a weapon* on school property on one or more of the past 30 days.

*such as a gun, knife, or club.

Percentage of students who had been threatened or injured with a weapon on school property one or more times during the past 12 months.

2001-2002 Izard County Youth Risk Behavior Survey

Percentage of students who were in a physical fight on school property one or more times during the past 12 months.

■ Tobacco Use at School

These questions measure tobacco use on school property.

Percentage of students who smoked cigarettes on school property on one or more of the past 30 days.

2001-2002 Izard County Youth Risk Behavior Survey

Percentage of students who used chewing tobacco or snuff on school property on one or more of the past 30 days.

■ Alcohol Use at School

This question measures alcohol use on school property.

Percentage of students who had at least one drink of alcohol on school property on one or more of the past 30 days.

2001-2002 Izard County Youth Risk Behavior Survey

■ Drug Use at School

These questions measure drug use and availability on school property.

Percentage of students who used marijuana on school property on one or more of the past 30 days.

Percentage of students who had someone offer, sell, or give them an illegal drug on school property during the past 12 months.
