## CSv2 ANSWER WORKSHEET

Rational for specific data elements:

When 2010 cases are actually available, borderline results will rarely, if ever, be utilized according to the new guidelines of the American Society of Clinical Oncology. However, there will doubtless be those cases where someone will refer to results as borderline, and for cases diagnosed prior to 2010, this code is still necessary. Therefore, a code for borderline is still available for both ER and PR.
