Hospital Hub Patient Care Record Display page: Click on 'Hospital Hub' on the Menu bar

- Far left hover will show whether ePCR is from V2 or V3.
- Column with percentage is the current validation score from the system (V2 & V3 are different)
- Column headings show info important to the Hub user – which columns appear can be customized using 'Settings'

ePCRs appear on Hospital Hub if the Destination Name is your Hospital. Sort order is most recent on top based on Arrival Date(Time). Records missing Arrival Date(Time) will be at the bottom – but all of your Hospital's Hub ePCRs can be found using 'Search'.

Past Medical History

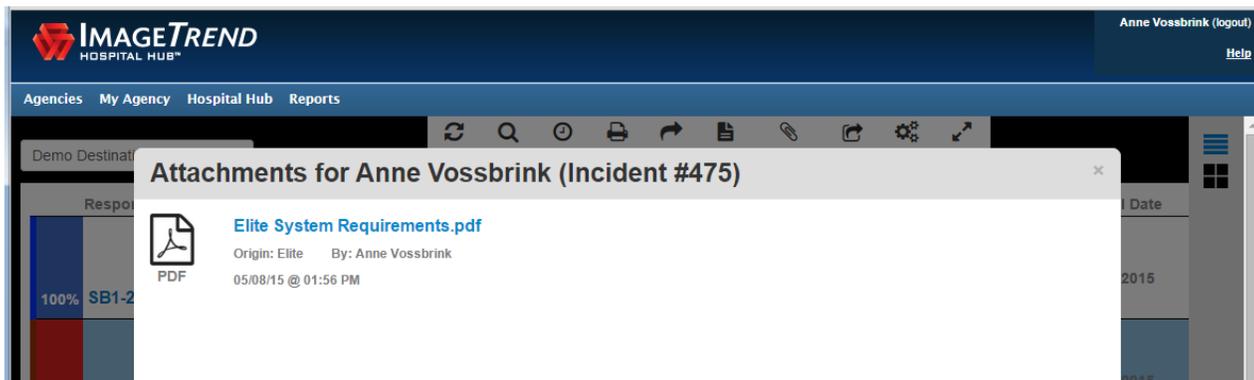

Related cases: Will show any possibly related cases. Related would mean same patient or same incident of service, as identified by certain key variables if these were completed. And, ePCRs listed for possible relatedness would only be ones viewable on your Hub. Future plans to have potentially related ePCRs listed based on Demographic info.

Log: Displays a log of ePCR access.

Attachments: View and Print any attachments that were made to the ePCR

Outcome: Both V2 and V3 ePCRs can have select patient outcome data entered by the Hospital for agency use.
