**Quinyatta Mumford, MPH, CHES**

**Public Health Preparedness Epidemiologist**

During flu season the Arkansas Department of Health (ADH) produces this Weekly Influenza Report for clinicians. The report provides information on flu activity in the state. The report also compares influenza-like illness (ILI) in Arkansas to activity in the US. ADH receives detailed reports of only a small fraction of flu cases. Therefore, it is important to understand that the information in the weekly update is representative of the timing and location of activity, but it does not reflect the overall burden of disease. It is presumed that there are many more people actually affected than the report shows.

### **Report Key points:**

- Arkansas reported “sporadic” activity to the Centers for Disease Control and Prevention (CDC) for Week 2.
- Since October 4, 2015, about 728 positive influenza antigen tests have been reported to ADH by health care providers. Week 2 reports were received from Baxter, Benton, Crawford, Crittenden, Grant, Izard, Jackson, Perry, Sebastian, Union, and White.
- Among flu antigen tests that can distinguish between Influenza A and B strains, 47 percent were A, and 53 percent were B.
- Almost 3 percent of patients visiting emergency rooms last week were there for ILI. About 3 percent were of outpatient visits were for ILI.
- The average school absenteeism rate last week was 6.4 percent.
- To date two influenza-related deaths have been reported in Arkansas this flu season. These flu deaths occurred in adults.
- For Week 1, the geographic spread of influenza in Guam, Puerto Rico, and nine states were reported as regional; 11 states reported local activity; the U.S. Virgin Islands and 28 states reported sporadic activity; and the District of Columbia and two states reported no influenza activity.
- The proportion of deaths in the U.S. attributed to pneumonia and influenza (P&I) is at 5.8 percent, and it continues to be below the epidemic threshold of 7.3 percent. This information is based on data available on January 14 of the deaths occurred during the week ending December 26, 2015 through the National Center for Health Statistics Mortality Surveillance System and the 122 Cities Mortality Reporting System.
- You can view the weekly influenza report during the influenza season at:

# 2015-2016 Influenza CD/Epi Weekly Report (Week 2: 01/10/16 - 01/16/16)

## Death Report for Week 2

- Deaths from all causes: 579
- Deaths due to Pneumonia: 51
- PCR confirmed Flu Deaths: 0
- Death Certificate or Flu Antigen only: 0

## Cumulative Flu Deaths since 10/04/2015

- PCR confirmed Flu deaths: 0
- Death Certificate or Flu Antigen only: 2
- Cumulative Flu deaths: 2

## ER Visits\*

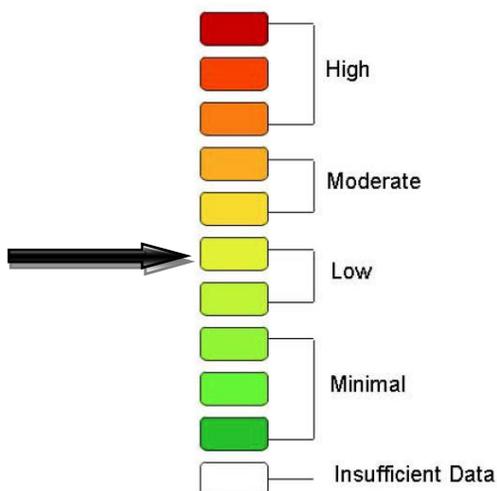

- **Week Ending: 01/16/2016**  
Weighted Average: 3.5% (36 Hospitals)  
– Total Visits: 12,165  
– Visits with ILI: 430
- **Previous Week**  
Weighted Average: 6.0% (40 Hospitals)  
– Total Visits: 15,871  
– Visits with ILI: 949

\*% is the number of ILI visits\*100/Total Visits

## Total Flu-Related Hospital Admissions

- **PCR Confirmed:**  
– Cumulative: 2  
– Week ending 01/16/2016: 1
- **ILI or Antigen Tested (Provisional):**  
– Cumulative: 285  
– Week ending 01/16/2016: 8

## Weekly Arkansas ILI Intensity Level Reported by Sentinel Providers

## PCR Lab Confirmed Influenza

- Total Cases since 10/4/2015: 7
- Week Ending 01/16/2016: 2

PCR Tests	ADH Lab Week 2	Other Labs Week 2	Cumulative Cases Since 10/4/2015
A+	0	1	2
B+	0	0	0
B/Victoria	0	0	0
B/Yamagata	0	0	0
H1N1+	1	0	3
H3+	0	0	2
Unsubtypable	0	0	0
<b>Total</b>	<b>2</b>	<b>0</b>	<b>7</b>
Negative	0	--	

## PCR Confirmed Influenza Cases since 10/4/2015

Age Groups	PCR+	Hospitalized	Deaths
0-4 yr.	0	0	0
5-18 yr.	2	1	0
19-24 yr.	1	1	0
25-49 yr.	1	0	0
50-64 yr.	1	0	0
>= 65 yr.	2	0	0
Unknown	0	0	0
<b>Total</b>	<b>7</b>	<b>2</b>	<b>0</b>

## School Absenteeism\*

- Week Ending: 01/16/2016  
– Percent Absent: 6.41%
- Previous week: 6.15%

\* Average daily absenteeism for all public schools during this reporting week.

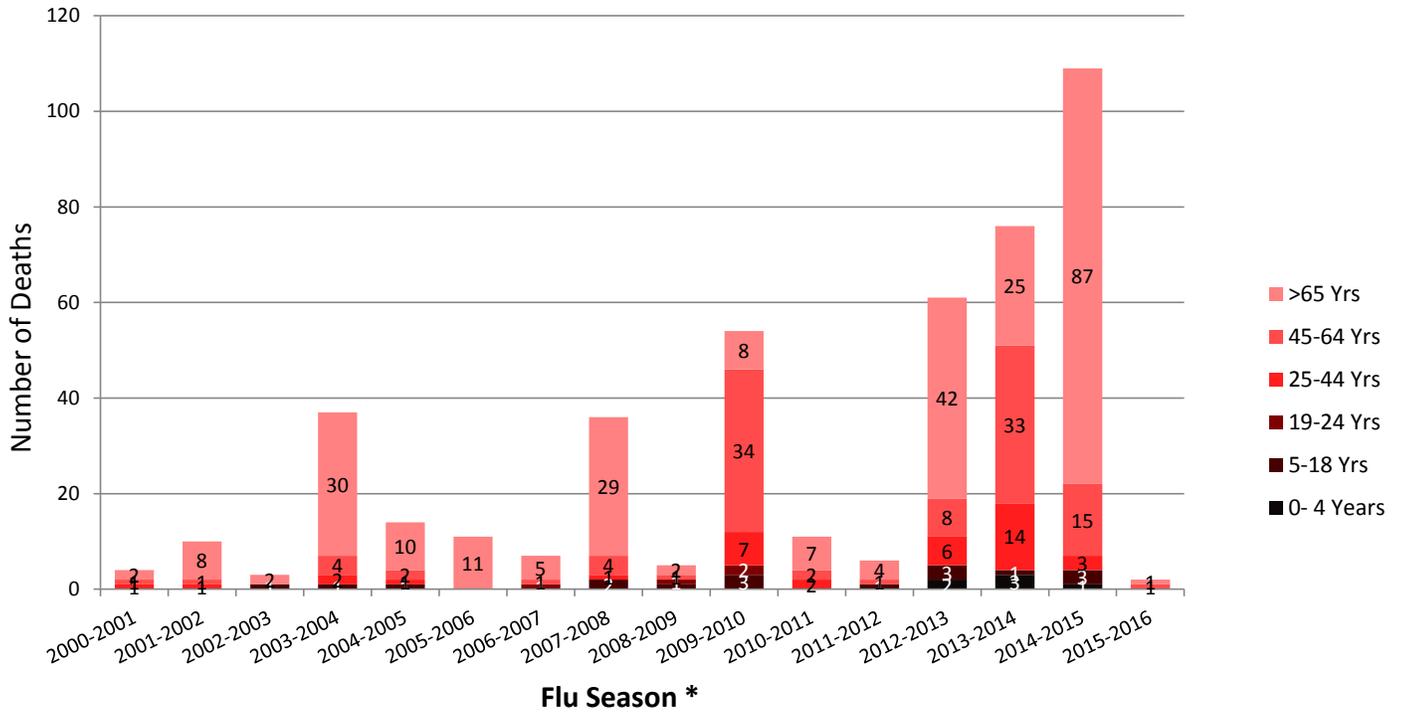

## Geographic ILI Activity Level Reported for Week 2:

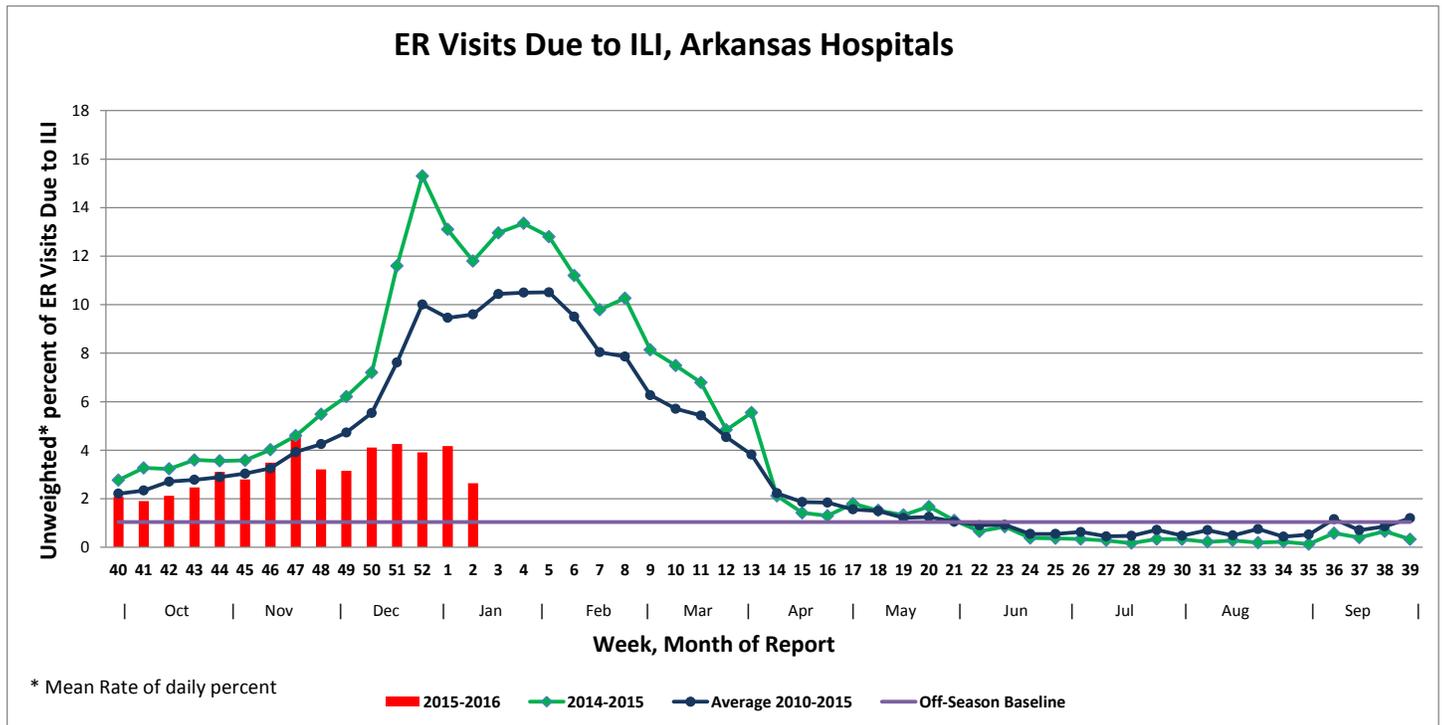

# Influenza Mortality by Age Group, Arkansas 2000-2016 (Provisional)

Report Updated: 12/22/2015

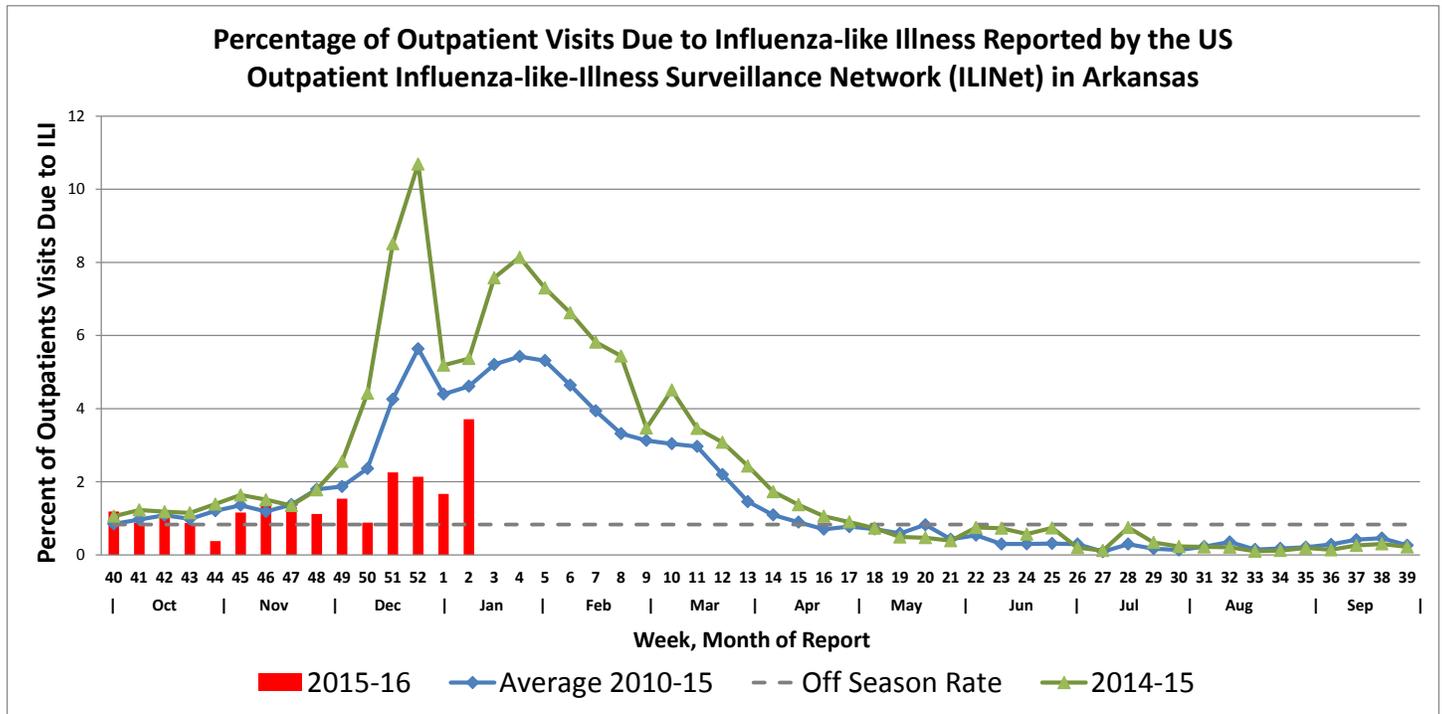

\* All seasons range from week 40 to week 39 except 2009-2010 started week 36  
 Source: ADH Immunization Section, Center for Health Statistics

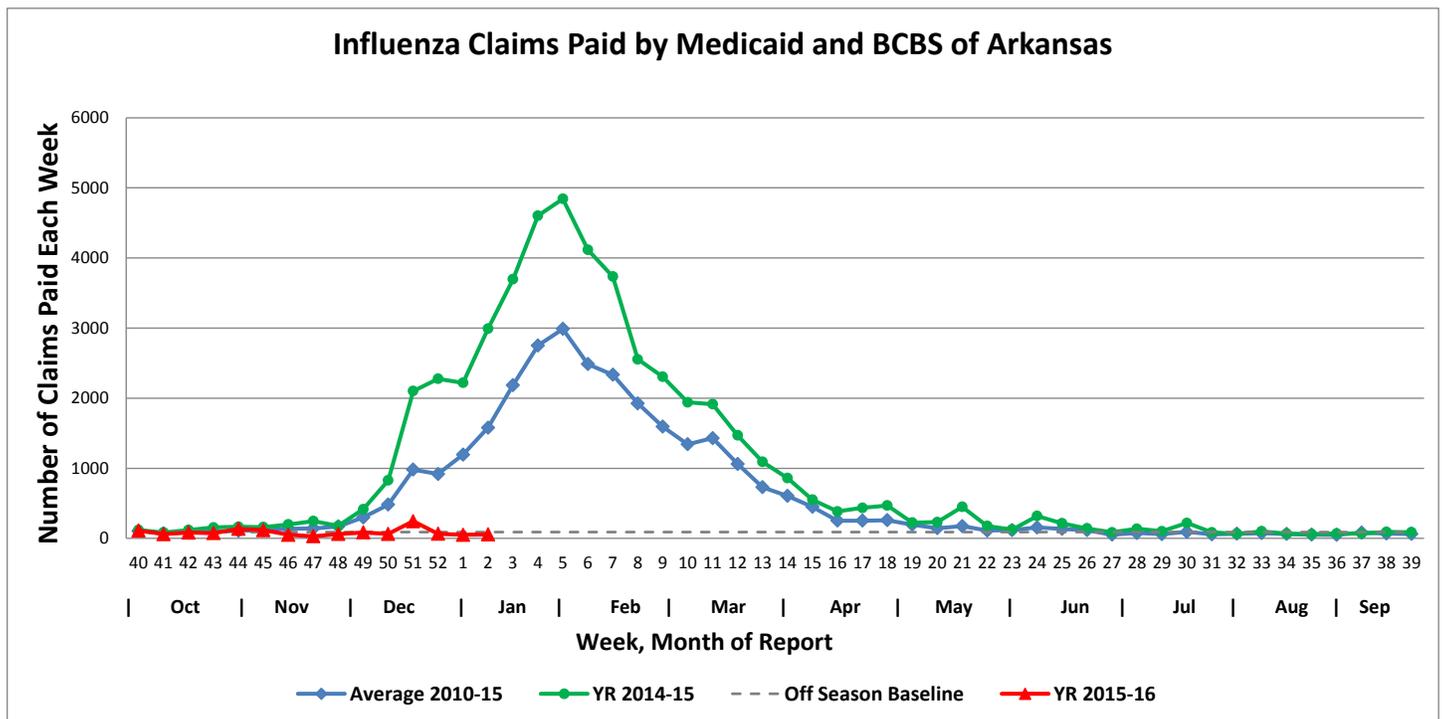

## Hospital Report – ER Visits With Influenza-Like-Illness (ILI)

# US Outpatients Influenza Surveillance (ILINET)

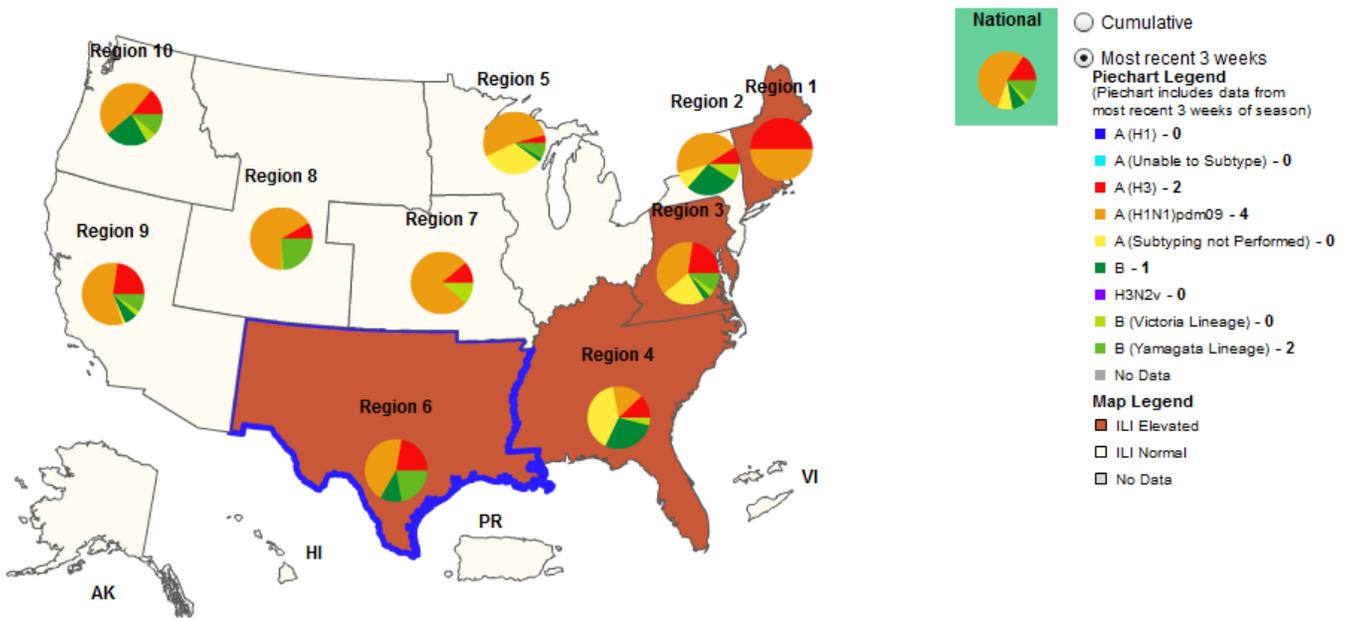

# Weekly Influenza Claims Paid by Medicaid and Blue Cross and Blue Shield (BCBS) of Arkansas

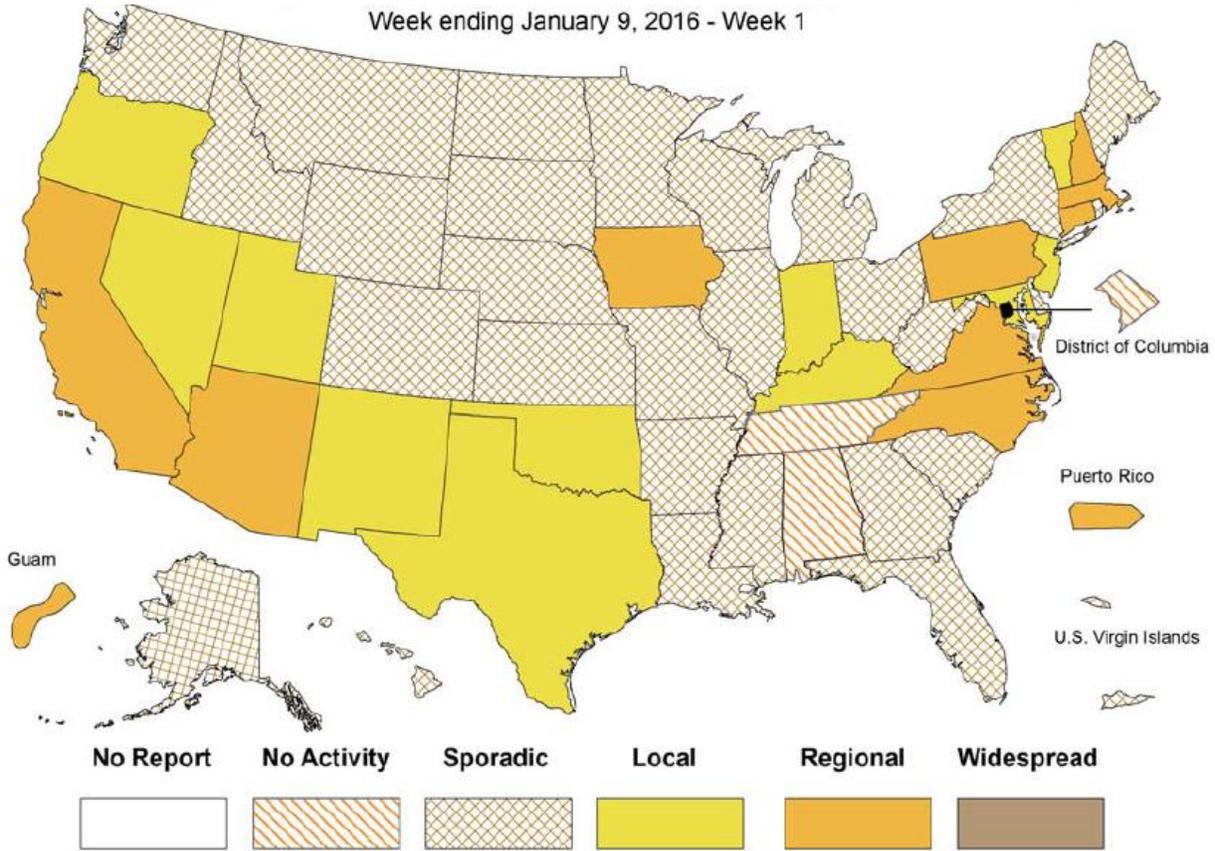

# Influenza Positive Tests Reported to CDC and ILI Activity, by HHS Region, 2015-2016 Season, Week Ending Jan. 08, 2016

Values in legend is for the highlighted HHS region (Region 6)

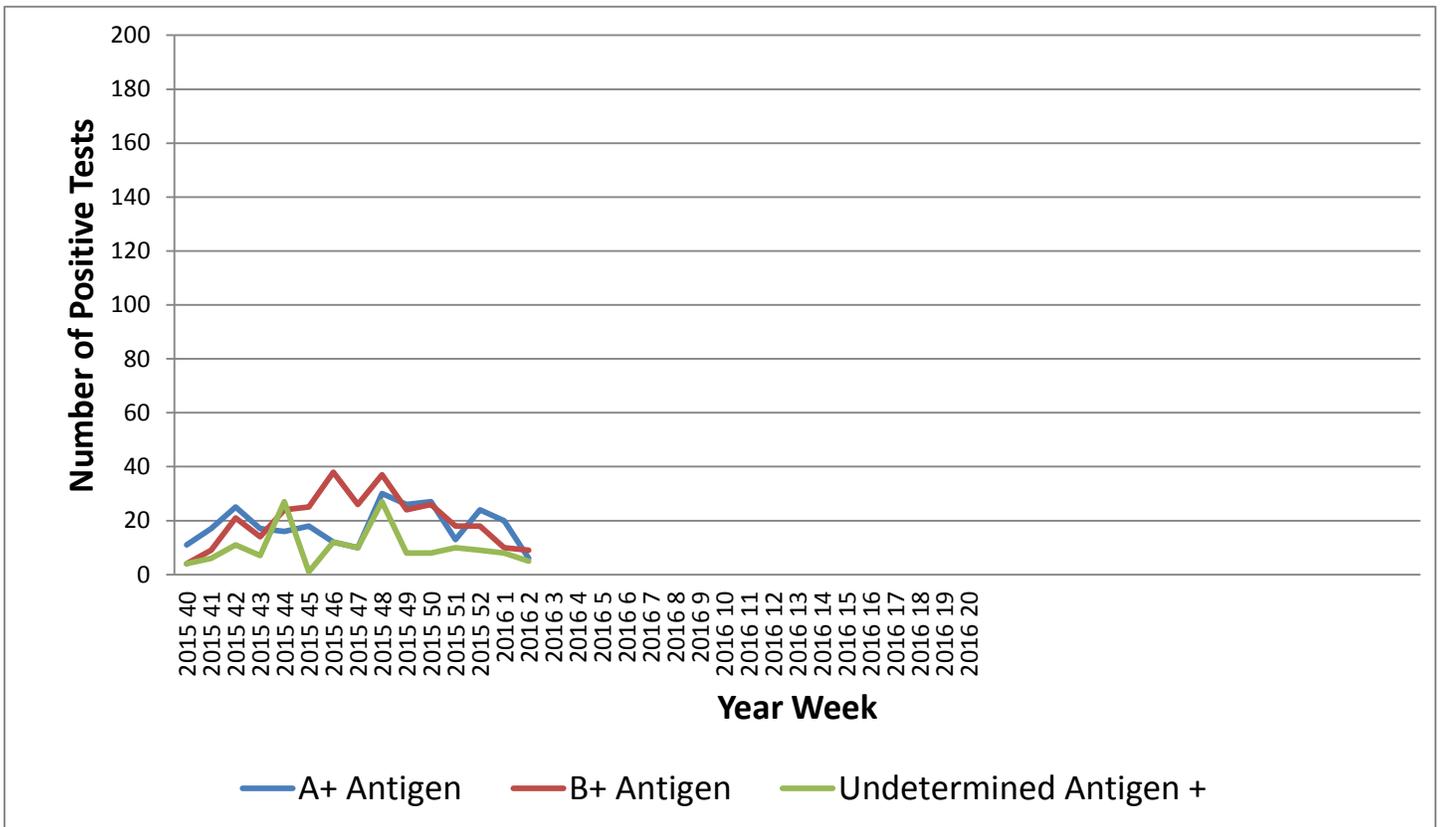

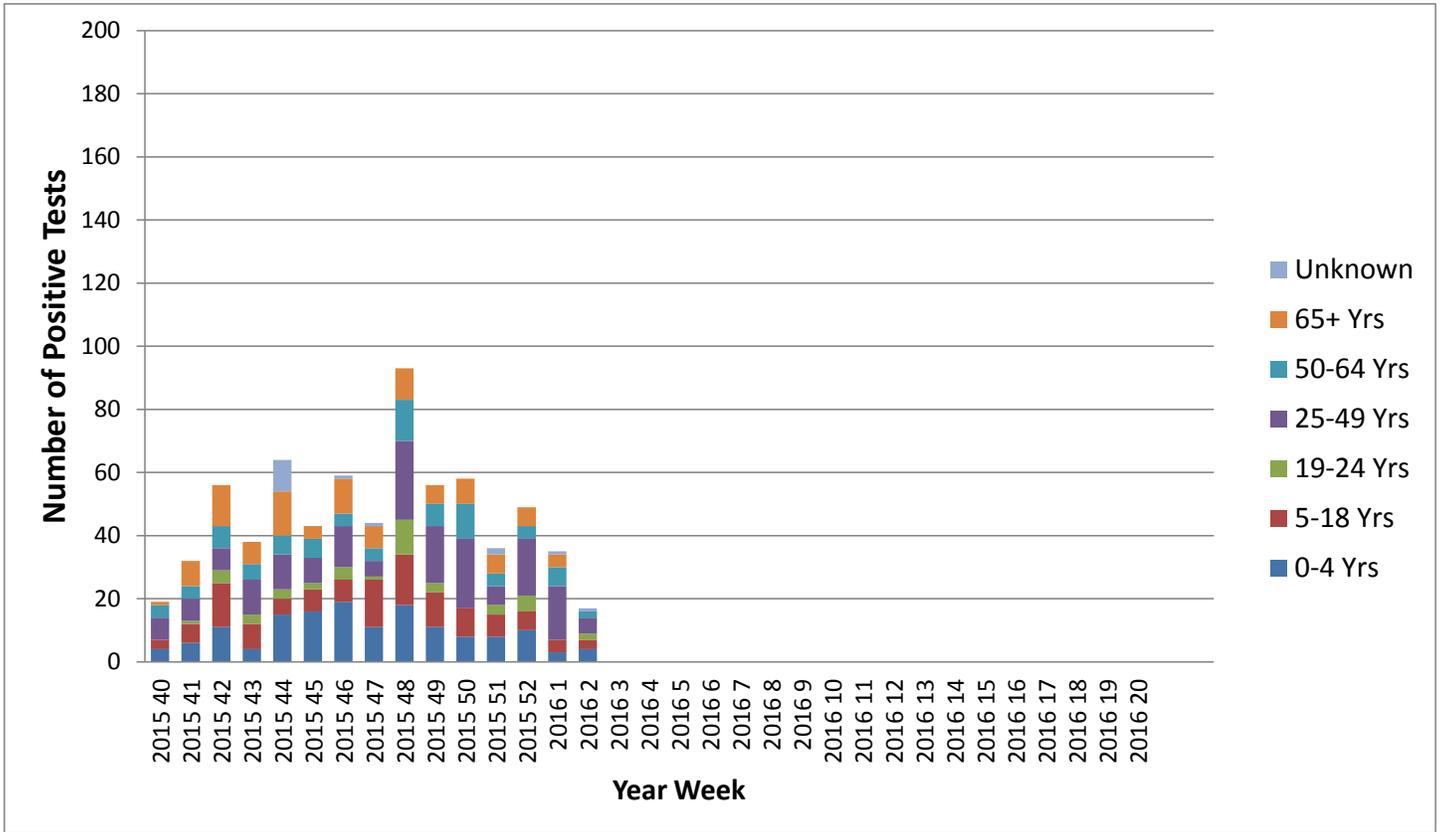

## Weekly Influenza Activity Estimates Reported by State and Territorial Epidemiologists

Week ending January 9, 2016 - Week 1

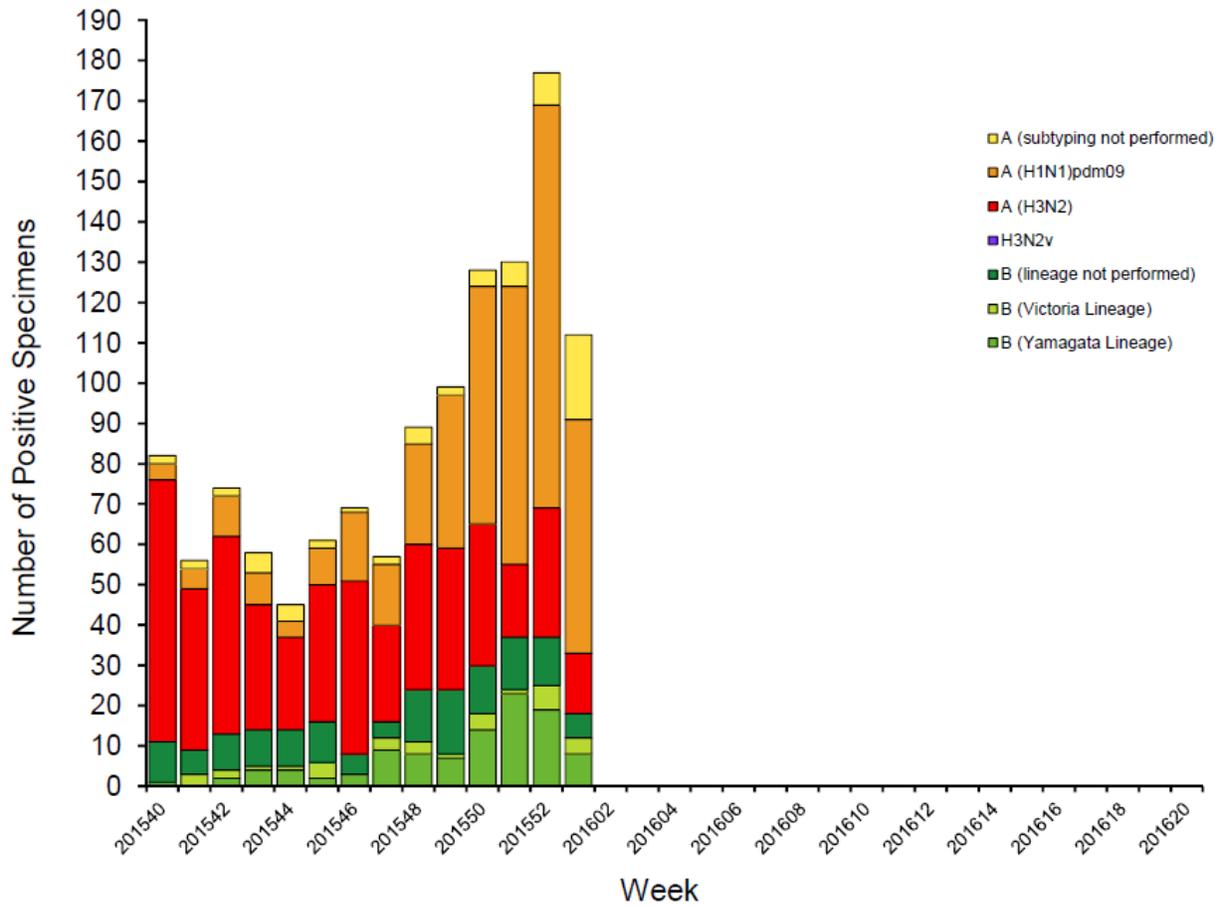

**Arkansas Flu Activity Level Reported for Week 2: Sporadic**

# Antigen Report:

## Influenza Positive Tests Reported to CDC by U.S. Public Health Laboratories, National Summary, 2015-16 Season
