

Arkansas Department of Health

## **Rabies Biologics**

**The Department of Health does not supply or maintain a supply of rabies vaccine as was once done in the past. Call your local distributor, pharmacy or hospital pharmacy.**

The health department is always available to help with a risk assessment, which we recommend prior to initiating Rabies Post-exposure Prophylaxis.

Call Dr. Susan Weinstein (501) 280-4136 or after hours (800) 633-1735.

### **Human rabies vaccine**
