

Caveats Regarding Hospital Discharge Data

- Data may contain duplicate entries as individuals may be admitted and transferred to another hospital for complications from an injury
- Hospitalization data in this profile was compiled using the county of residence
- Injury cases in this report were required to have an injury code in the principal diagnosis slot and a valid E-code, which may lead to under-reporting of data
- Rehab and Psychiatric hospitals were excluded
- Masked values are statistically unstable
- Counts under 20 are statistically unstable
- Arkansas does not receive hospitalization data from hospitals outside of Arkansas
