

# SUPER TOOTH SAVES THE DAY!

Dental Sealants Protect Against Tooth Decay!

**Super Tooth's** secret weapon in the fight against tooth decay is called Dental Sealants. It's a simple, painless method used by dentists and dental hygienists to protect teeth with a thin plastic coat, effectively keeping out bacteria and food particles that cause tooth decay. It works, and the cost is often covered by ARKIDSFIRST and most dental insurance plans.

With Dental Sealants, fluoridated water and regular dental check-ups, there's a great chance that kids don't ever have to get cavities. And that's great news for parents, teachers, and little teeth everywhere!

Check with your dentist **TODAY** to find out more about dental sealants, or visit our website at [www. http://www.aroralhealth.com/](http://www.aroralhealth.com/)
