

Arkansas Trauma Communications Center Preferred Radio Report Format

Ambulance Service name & unit #

Location (city)

Age & gender of patient

Trauma Band#

Mechanism of Injury

Chief Complaint / main injury

Physiological status of patient (V/S & GCS)

Assessment findings

*Any special patient or system considerations (PRN)

*Any additional help requested (air or ground intercept etc.) (PRN)

**Full Tx performed IS NOT required to assist in destination considerations, rather the inability to perform any Tx that could hinder transport should be relayed to ATCC.

**TraumaComm may ask for additional info to better assess neuro-trauma patients. EMS crews should reference the ATCC Neuro-Trauma “go-by” as needed.

**If the patient has “special considerations/conditions” that may elevate the Trauma Triage Level, please relay these to ATCC for proper rating.

*****ALL Major & Moderate trauma patients** (as defined by the Arkansas Trauma Field Triage Decision Scheme) shall have coordination with TraumaComm prior to arrival at an ED.***

*Air Ambulances should utilize the ground ambulance AWIN radio to contact TraumaComm until equipped with the appropriate radios.ⁱ
