

HIV Surveillance Report Arkansas, 2015

Arkansas Department of Health
Keeping Your Hometown Healthy

This issue of the HIV Surveillance Report is produced by the Arkansas Department of Health, STI/HIV/Hepatitis C/TB Section.

Data are presented for incidence and prevalence of HIV infection among residents of Arkansas based on data reported to the HIV Surveillance Program as of December 31, 2015.

DISCLAIMER:

Since January 2014 the Arkansas HIV Surveillance Program has been conducting data cleaning activities on Arkansas surveillance data to ensure the most accurate picture of the HIV epidemic in Arkansas. As a result of this process, there may be a difference in the number of cases reported in previous issues of this document. Increased numbers of cases presented in this report partly reflect inclusion of incomplete case reports from prior years. A case is assigned to a specific year if the case is completed and reported in that year regardless of when the diagnosis is made. For best estimates of new diagnoses for any specific year, refer to the annual Integrated HIV Epidemiologic Profile which is published approximately one year after the HIV Annual Surveillance Summary report.

The Arkansas HIV Surveillance Report can be obtained from the internet at:

<http://www.healthy.arkansas.gov/programsServices/healthStatistics/Pages/stdHivRegistry.aspx>

Information on how to report HIV and STD cases may be obtained by contacting a county health department or local health unit or by calling (501) 661-2887.

HIV/AIDS Incidence by Public Health Regions Arkansas, 2015 by Report Date

AIDS Incidence is defined as the number of new AIDS cases reported during the period specified. Please note that a case is counted only once during a year even if the diagnostic status progresses from HIV to AIDS. Once a case progresses to AIDS status it remains, and is never reclassified as HIV.

HIV-NA Incidence is defined as the number of new HIV- non-AIDS cases reported during the period specified.

HIV/AIDS Incidence is defined as the sum of new HIV-NA cases and new AIDS cases reported during the period specified.

2007	176	46.1%	206	53.9%	382
2008	89	29.9%	209	70.1%	298
2009	171	48.0%	185	52.0%	356
2010	131	39.8%	198	60.2%	329
2011	111	37.0%	189	63.0%	300
2012	92	35.0%	171	65.0%	263
2013	145	41.9%	201	58.1%	346
2014	146	34.0%	283	66.0%	429
2015	133	40.3%	197	59.7%	330
Cumulative Total	4,899	46.7%	5,584	53.3%	

Note: Due to rounding, percentages may not add up to 100 percent.

AIDS Incidence is defined as the number of new AIDS cases reported during the period specified. Please note that a case is counted only once during a year even if the diagnostic status progresses from HIV to AIDS. Once a case progresses to AIDS status it remains, and is never reclassified as HIV.

HIV-NA Incidence is defined as the number of new HIV- non-AIDS cases reported during the period specified.

HIV/AIDS Incidence is defined as the sum of new HIV-NA cases and new AIDS cases reported during the period specified. Within each year, each case is only shown once (can be either an HIV-NA case or an AIDS case).
