APRNs holding DEA Certificate

APRNs holding a DEA certificate shall register for access to the Arkansas Prescription Monitoring Program (AR PMP) database via the AR PMP website.

Act 820 (2017) mandates all prescribers to check the information in the AR PMP when prescribing:

a. An opioid from Schedule II or Schedule III for every time prescribing the medication to a patient; and
b. A benzodiazepine medication for the first time prescribing the medication to a patient.

In addition, you are responsible for ASBN Rules relating to the AR PMP. They are located at ASBN Rules, Chapter 4, Section VIII, K. According to ASBN Rules, an APRN must also check the AR PMP when initially prescribing a benzodiazepine and every six months.

The AR PMP was created to assist healthcare practitioners in the battle against prescription drug abuse. Act 304 (2011) established the AR PMP to be implemented under the direction of the Arkansas Department of Health. Prescribers can view their patient’s history of filled prescriptions for controlled substances prior to prescribing a controlled substance. When a pharmacist fills a prescription for a controlled substance (Schedules II - V), this information is sent to the AR PMP databank.
