

OUR BEST SHOT TO GET BACK TO NORMAL.

Let's protect our loved ones from viruses like the flu and COVID-19. Get your flu shot now, and the COVID-19 vaccine soon. Vaccines are rigorously tested for safety and effectiveness. And they are not used if they are harmful or do not work. At first, the COVID-19 vaccine will be in limited supply. Later, the vaccine will be available for the general public. This is our best shot to get back to normal. Learn more at [Healthy.Arkansas.gov](https://www.healthyarkansas.gov).
