The Prospective Contractor expressly acknowledges and agrees that state funds may not be expended in connection with the purchase of information technology unless that technology meets the statutory Requirements found in 36 C.F.R. § 1194.21, as it existed on January 1, 2013 (software applications and operating ICSs) and 36 C.F.R. § 1194.22, as it existed on January 1, 2013 (web-based intranet and internet information and applications), in accordance with the State of Arkansas technology policy standards relating to accessibility by persons with visual impairments.

  2. With at least one customer processing data from at least 100 different sources

**2.2 OVERVIEW AND BACKGROUND**

- A. The State Health Alliance for Records Exchange (SHARE) is the State of Arkansas’ health information exchange (HIE). It is the product of the Arkansas Department of Health - Office of Health Information Technology (OHIT).
- B. Our Mission is to improve the delivery, coordination, and quality of health care across Arkansas through the state-wide use of health information technology and clinical data exchange.
- C. SHARE is part of the Health Information Technology (HIT) initiative, which involves transitioning hospitals and clinics from paper health records to electronic health records (EHR), and then securely connecting those EHR systems to SHARE where patient health records are accessible to all participating treating providers.

- D. Beyond HIT, SHARE also plays a critical role in all the Arkansas health reform initiatives by providing the holistic patient health data that drives diagnosis and treatment decisions and simplifying care coordination as we move from one care giver to the next.
- E. SHARE is a powerful tool that will improve the quality of patient care, enhance the coordination of care, and reduce the overall cost of health care in our state. The use of SHARE and the exchange of health information—combined with all of the health care reform initiatives—can improve the overall health of our state.
- F. Our vision is a healthier state population and a greatly improved health care system in which care givers and patients have electronic access to more complete health records and are empowered to make better health decisions with this information.
- G. Health information exchange allows clinical information to move electronically among disparate health information systems. The goal of the HIE is to deliver the right health information to the right place at the right time - providing safer, timelier, efficient, effective, equitable, patient centered care. In doing so, SHARE offers a suite of tools aimed at improving the facilitation of care for our region's providers.
- H. SHARE provides a Portal for clinical staff. As clinical information is created and shared with SHARE, it is made accessible in real time to participating health care providers through the SHARE Portal, SHARE Encounter notification services, shared in context to EHR 's and used for population health reports.

### **2.3 DATA MANAGEMENT AND REPORTING**

- A. The support for our current Master Patient Index (MPI) is not meeting our needs so OHIT is seeking other MPI options. SHARE also has a backlog of unexamined items (work queue) that needs to be cleaned up.
- B. The MPI solution must be capable of processing new sources of data as SHARE adds new customers.
- C. The support for our current Master Patient Index (MPI) is not meeting our needs so OHIT is seeking other MPI options. SHARE also has a backlog of unexamined items (work queue) that needs to be cleaned up.
- D. OHIT is also partnering with other state departments and units in assisting them in delivering much needed data, state registries and other databases. This will require the awarded contractor to clean up partnered databases to enhance accurate patient matching.
- E. SHARE's MPI serves as the foundation for managing an individual's data to ensure identity integrity and to accurately link the individual's information. The MPI serves as an essential component of accurate patient identification and therefore demands active data stewardship, data governance, and many collaborative processes. The role of the MPI is more critical than ever due to: increasing reliance on computerized patient information; development of health information exchange initiatives; integration of healthcare delivery systems (including the establishment of multihospital systems and vertical integration of hospitals, physician practices, home care agencies, long term care, and other non-acute facilities).
- F. Reporting of Performance Standards, Matches, etc. and Analysis of MPI must be included in the solution.

### **2.4 MATCHING PATIENTS**

- A. Accurately and consistently link identities across multiple facilities to create a single view of a patient. A near-zero tolerance of a false positive match rate with a low tolerance of a false negative match rate.
- B. Accurate cross-entity/cross-source patient identity management is critical for an HIE to function with the trust of its participants.
- C. The MPI solution must account for Baby Boy, Baby Girl and Trauma patients and match them when the real data comes in.
- D. The MPI solution must manage the data properly when a source registers a patient under the wrong ID. It also must have a way to un-merge or un-link wrong patients
- E. Privacy and confidentiality can be jeopardized unknowingly. Incorrect patient identification, especially overlays, can result in SHARE inappropriately connecting medical records for two different people into the same virtual chart.
- F. SHARE is increasingly participating in real-time information sharing directly into source EMR's (EPIC, Cerner, eClinicalWorks, Athena, etc.) This puts pressure on the MPI as those transactions require sub second response overall including the time required by the MPI.
- G. SHARE needs a streamlined solution also for unmatching or unlinking when a source sends in data after the source registered the wrong patient to the wrong medical record or documented in the wrong patient's chart.

### **2.5 SCALE**

- A. When crafting the RFP response be mindful that OHIT only has enough operational staff to perform manual work on perhaps a dozen transactions per day. Solutions that require manual intervention as a matter of routine course are impractical. Kindly focus answers on solutions that can operate without manual intervention at the scale described below.
- B. The MPI solution needs to include any and all training/support through the length of the contract
- C. Implementation needs to be completed within 60 days of the award of the contract.

- D. Any and all upgrades to the MPI Solution should be included in the cost of the contract.
- E. Focus little attention on the user experience as it relates to capabilities like manually joining/separating records as that is an edge case.
- F. Numbers
  - 1. Gross Population (MRN's): 14,812,554
  - 2. Net Population (MPI): 3,602,290
  - 3. Unexamined Items: 4,994,797
  - 4. ID Domains: 527

**2.6 ENGAGEMENT OBJECTIVE**

- 1. ADH is soliciting competitive, responsive proposals from experienced and financially sound organizations to implement a Master Patient Index (MPI) solution for SHARE. This identity management solution is anticipated to improve processes and approach by linking medical records from multiple sources into a single enterprise. By implementing the MPI, SHARE will achieve a unified view of member data, within SHARE and participating state registries and state databases, to improve the precision and quality of data necessary to enhance care coordination and data quality for electronic clinical quality management reporting for partnering members.

**2.7 PERFORMANCE STANDARDS**

- A. State law requires that all contracts for services include performance standards for measuring the overall quality of services provided that a contractor **must** meet in order to avoid assessment of damages.
- B. Vendor must meet all applicable State and Federal Laws.
- C. The State may be open to negotiations of performance standards prior to contract award, prior to the commencement of services, or at times throughout the contract duration. Table Below: Performance Standards identifies expected deliverables, performance measures, or outcomes; and defines the acceptable standards.
- D. The State has the right to modify, add, or delete performance standards throughout the term of the contract, should the State determine it is in its best interest to do so. Any changes or additions to performance standards will be made in good faith following acceptable industry standards and may include the input of the contractor so as to establish standards that are reasonably achievable.
- E. All changes made to the performance standards will become an official part of the contract.
- F. Performance standards will continue throughout the aggregate term of the contract.
- G. Failure to meet the minimum performance standards as specified may result in the assessment of damages.
- H. In the event a performance standard is not met, the contractor will have the opportunity to defend or respond to the insufficiency. The State has the right to waive damages if it determines there were extenuating factors beyond the control of the contractor that hindered the performance of services. In these instances, the State has final determination of the performance acceptability.
- I. Should any compensation be owed to the State agency due to the assessment of damages, contractor **shall** follow the direction of the State agency regarding the required compensation process.

PERFORMANCE STANDARDS		
Service Criteria	Acceptable Performance	Damages for Insufficient Performance
Single Match Rate	>= 98%	May result in cancelation of contract
System Guaranteed Up Time	>=99.999%	For Every .001% of outage 1% of the Annual Contract
False Positive Matches	<=0.5%	For Every 1% of false positives 1% of the Annual Contract
Matching Response Times	<=500ms	For Every aggregate average >500ms .05% of the Annual Contract for every 25ms >500ms

## SECTION 3 – CRITERIA FOR SELECTION

- Do not provide responses to items in this section.

### 3.1 TECHNICAL PROPOSAL SCORE

- A. ADH will review each Technical Proposal Packet to verify submission requirements have been met. Technical Proposals Packets that do not meet submission requirements will be disqualified and will not be evaluated.
- B. An agency-appointed evaluation committee will evaluate and score qualifying proposals. Evaluation will be based on the prospective contractor’s response to the Information for Evaluation section included in the Technical Proposal Packet.
  1. Members of the evaluation committee will individually review and evaluate proposals and complete an individual score worksheet for each proposal. Individual scoring for each Evaluation Criteria will be based on the following scoring description.

Quality Rating	Quality of Response	Description	Confidence in Proposed Approach
5	Excellent	When considered in relation to the RFP evaluation factor, the proposal squarely meets the requirement and exhibits outstanding knowledge, creativity, ability or other exceptional characteristics. Extremely good.	Very High
4	Good	When considered in relation to the RFP evaluation factor, the proposal squarely meets the requirement and is better than merely acceptable.	High
3	Acceptable	When considered in relation to the RFP evaluation factor, the proposal is of acceptable quality.	Moderate
2	Marginal	When considered in relation to the RFP evaluation factor, the proposal’s acceptability is doubtful.	Low
1	Poor	When considered in relation to the RFP evaluation factor, the proposal is inferior.	Very Low
0	Unacceptable	When considered in relation to the RFP evaluation factor, the proposal clearly does not meet the requirement, either because it was left blank or because the proposal is unresponsive.	No Confidence

2. After initial individual evaluations are complete, the evaluation committee members will meet to discuss their individual ratings. At this consensus scoring meeting, each member will be afforded an opportunity to discuss his or her rating for each evaluation criteria.
3. After committee members have had an opportunity to discuss their individual scores with the committee, the individual committee members will be given the opportunity to change their initial individual scores, if they feel that is appropriate.
4. The final individual scores of the evaluators will be recorded on the Consensus Score Sheets and averaged to determine the group or consensus score for each proposal.
5. Other agencies, consultants, and experts may also examine documents at the discretion of the agency.

C. The Information for Evaluation section has been divided into sub-sections.

1. In each sub-section, items/questions have each been assigned a maximum point value of five (5) points. The total point value for each sub-section is reflected in the table below as the Maximum Raw Score Possible.
2. The agency has assigned weighted percentages to each sub-section according to its significance.

Information for Evaluation Sub-Sections	Maximum Raw Points Possible	Sub-Section's Weighted Percentage	* Maximum Weighted Score Possible
E.1 Data Management and Reporting	45	25	175
E.2 Matching Patients	30	25	175
E.3 Scale	20	25	175
E.4 Performance Standards	40	25	175
<b>Total Technical Score</b>	<b>135</b>	<b>100%</b>	<b>700</b>

\*Sub-Section's Percentage Weight x Total Weighted Score = Maximum Weighted Score Possible for the sub-section.

D. The proposal's weighted score for each sub-section will be determined using the following formula:

$$(A/B) * C = D$$

A = Actual Raw Points received for sub-section in evaluation  
 B = Maximum Raw Points possible for sub-section  
 C = Maximum Weighted Score possible for sub-section  
 D = Weighted Score received for sub-section

E. The proposal's weighted scores for sub-sections will be added to determine the Total Technical Score for the proposal.

F. Technical Proposals that do not receive a minimum weighted score/subtotal of 350 [A3] may not move forward in the solicitation process. The pricing for proposals which do not move forward will not be scored.

**3.2 COST SCORE**

A. When pricing is opened for scoring, the maximum amount of cost points will be given to the proposal with the lowest annual total [A4] as shown on the Official Bid Price Sheet. (See Grand Total Score for maximum points possible for cost score).

B. The amount of cost points given to the remaining proposals will be allocated by using the following formula:

$$(A/B) * (C) = D$$

A = Lowest Total Cost  
 B = Second (third, fourth, etc.) Lowest Total Cost  
 C = Maximum Points for Lowest Total Cost  
 D = Total Cost Points Received

**3.3 GRAND TOTAL SCORE**

The Technical Score and Cost Score will be added together to determine the Grand Total Score for the proposal. The prospective contractor’s proposal with the highest Grand Total Score will be selected as the apparent successful Contractor (See Award Process).

	Maximum Points Possible
Technical Proposal	700
Cost	300
<b>Maximum Possible Grand Total Score</b>	<b>1,000</b>
