1.1 PURPOSE

The Arkansas Department of Health (ADH) issues this Request for Application (RFA) to obtain applications for funding to meet grant funding deliverables of the Center for Disease Control (CDC) PS20-2010 funding award for ensuring at least 25% of the total funds directed to the local Ending the HIV Epidemic (EHE) jurisdiction supports planning and implementation of EHE activities by community organizations.

1.2 BACKGROUND

For more than 35 years, HIV has affected millions of Americans of whom more than 700,000 have died. In recent years, deaths among persons with HIV have declined, while the number of people with HIV has increased. According to CDC, an estimated 1.1 million persons are living with HIV and approximately 15% are unaware they have HIV. Unless effectively treated to achieve viral suppression, HIV can be transmitted to others and leads to premature death. However, person with HIV who use antiretroviral therapy (ART) and reach and maintain an undetectable viral load in their blood can have a nearly normal life expectancy and have effectively no risk of transmitting HIV to others through sex.

Reaching and maintaining viral suppression among people with HIV is the most effective way to reduce new infections. Efforts that uniquely target HIV-negative persons, for example-pre-exposure prophylaxis (PrEP), are critical supplements to effective treatment; and behavioral strategies (e.g., use of condoms and reduction of sexual partners) are proven effective strategies to reduce risk of HIV transmission in both those with and without HIV.

Community partners are uniquely positioned to complement and extend the reach of HIV prevention efforts implemented by state and local health departments. Thus, it is critical that health departments consider the most productive means for reaching out and engaging the community and other partners. For purposes of this funding opportunity, community organizations include non-profit or private organizations, American Indian/Alaska native tribally designated organizations, community based organizations, faith based organizations, hospitals, and health centers.

To ensure HIV testing and diagnosing, treatment, prevention, and responding efforts are available statewide for "Ending the HIV Epidemic".

2.2 **RECIPIENT REQUIREMENTS**

The ADH, Infectious Disease Branch, Ending the HIV Epidemic Program has developed areas for innovative initiatives to be implemented within the state through community organizations. These areas allow for activities to be established within the state that support the four pillars of diagnose, treat, prevent, and respond; developed by the Department of Health and Human Services for "Ending the HIV Epidemic".

Activities should be developed towards the areas of:

- **Mass Health Communications and HIV Education:** This area of innovation and implementation should provide HIV education and awareness to communities throughout the state and to populations that are marginalized and at high risk exposure (e.g.: low income and rural areas, minorities, adolescents, gay and bisexual men, women, and injection drug users). **Available Funding:** \$75,000 available in funding for one (1) organization.

The ADH will provide technical assistance to the funded agency for ensuring state policies and guidelines are known and followed. The HIV health mass communication efforts should reach statewide with emphasis on targeting those populations at high risk and marginalized within the state.

The preference is for Mass Health Communication and HIV Education to be made available statewide.

- **Pre-exposure Prophylaxis (PrEP) Awareness and Navigation:** This area of innovation and implementation should be developed for the establishment of a model within the state for persons who are HIV negative seeking assistance/guidance with obtaining PrEP. The PrEP patient navigator model takes the lead with those testing negative to ensure the patient is educated about safe behaviors and PrEP; receives assistance to a PrEP provider for care and the necessary lab work to start PrEP; and is assisted with the costs of medication to eliminate any barrier to medication adherence. The model must include HIV testing and counseling for the identification of persons who are at risk for being HIV positive to ensure they are aware of their status; and persons who are HIV negative to ensure they remain negative through available preventive measures. **Available Funding:** \$264,492 available in funding towards two (2) organizations. - 4) Implementation of a developed logistics plan for ensuring transportation assistance to PrEP provider for care services.

The preference is for PrEP Awareness and Navigation assistance to be made available statewide. The ADH will provide technical assistance to the funded agency for ensuring state policies and guidelines are known and followed.

- **Linkage to Care:** This area of innovation and implementation should be developed for the establishment of a model within the state for people who are living with HIV needing transportation assistance to HIV care appointments and HIV supportive services appointments. **Available Funding:** \$60,000 available in funding to multiple organizations/entities based on the following allocation for each area:

Proposals should include how organization will ensure patient confidentiality and non-disclosure of health information. Applicant personnel must have a valid driver's license, insurance, and a quality mode of transportation.

The preference is for HIV Transportation assistance to be made available statewide. Refer to the attached document to identify the areas available for serving.

- **Faith-Based Engagement:** This area of innovation and implementation should be developed for the establishment of a model within the state that engages faith-based churches and organizations for incorporating knowledge, awareness and testing opportunities within their activities and/or ministries. **Available Funding:** \$30,000 available in funding towards two (2) organizations open to all areas of the state.

The model proposal should include the following components:

development of health fairs for screening for a variety of diseases that disproportionately impact minorities. These may include:

- HIV Screening
- COVID screening
- Hypertension Screening
- Glucose
- BMI

Bundling HIV screenings with other screenings helps to promote uptake of HIV screening, which is often stigmatized.

- **Testing and Education:** This area of innovation and implementation should be developed for the establishment of a model within the state for identifying persons for HIV testing. Establishing and implementing models for HIV testing that is expanded beyond the current avenues within the state. The model should include linking persons to their initial medical appointment. Funded organizations must test yearly 200 to 300 non-duplicated persons with a 1% positivity rate. Available Funding: \$100,000 available in funding towards two (2) organizations for serving the areas of Southwest and/ or Southeast.

The model proposal should include details for meeting grant deliverables of more than one of the following:

- 1) Testing persons at high risk exposure for HIV at non-traditional settings (ex. clubs/bars, pop-testing locations, partnership with locally owned pharmacies, schools, county jails, etc.)
