Ethics of Nursing Practice provides the foundation for ethical nursing practice and explores the connection between personal and professional values. It also illustrates the basis for regulations and standards of care for ethical nursing practice. The course examines the ways that ethical nursing practice supports patient advocacy and provides strategies that nurses can use to promote moral action. With an awareness of patient rights and ethical principles, nurses are ideally suited to advocate for the patient and maintain the public trust in the profession of nursing. Learners complete workbook exercises reflecting on “real life” scenarios.
