

Paraprofessional Training
Children with Special Health Care Needs

Pre-Test/Post-test

Directions: Indicate whether the following statements are – True (T) or False (F)

- | | | | |
|---|---|-----|--|
| T | F | 1. | Paraprofessionals must have Registered Nurse supervision when assigned a delegated nursing task. |
| T | F | 2. | If a bus driver at school asks about a student you care for, it is acceptable for you to share information with the driver. |
| T | F | 3. | Handwashing is the most important procedure for preventing infectious disease transmission. |
| T | F | 4. | Health care procedures performed for students are documented by the Registered Nurse only. |
| T | F | 5. | When gloves are worn by the paraprofessional, it is acceptable if hands are not washed after removing the gloves. |
| T | F | 6. | If broken glass or sharp objects are involved in a spill, use a brush and dustpan to remove the objects. |
| T | F | 7. | Always lift students by yourself. |
| T | F | 8. | Blue lips or nailbeds is an early sign of decreased oxygen in a person. |
| T | F | 9. | It is important to remain calm in any emergency. |
| T | F | 10. | It is important to follow the student's health care plan. |
| T | F | 11. | Training for health care related procedures should be provided by a Registered Nurse. |
| T | F | 12. | The only time a paraprofessional should wear gloves is when he or she is cleaning a spill. |
| T | F | 13. | If the student wears a diaper, it is allowed to change the diaper in the classroom with other students as long as the students cover their eyes. |
