

COVID-19

Resources for Undocumented and Uninsured Patients

MARCH 31, 2020

No matter your immigration or insurance status, you CAN get help with COVID-19 (Coronavirus):

- You can get screened for COVID-19 and tested if needed.
- You can get care and treatment if it is needed.
- You can get a vaccine if one is available later.

These services SHOULD NOT:

- Require a form of Identification.
- Count as a “public charge” or affect the other public benefits (like Medicaid or SNAP) that you are receiving.
- Affect your application to extend your stay in the U.S.
- Change your immigration status.
