

Collaborative Care Dental Hygiene: Characterizing the Need In Arkansas

Act 89, passed by the Arkansas General Assembly in 2011, gave the Arkansas Board of Health the authority to promulgate rules and regulations pertaining to dental hygienists working under collaborative care permits with licensed dentists for the purpose of expanding dental services to underserved areas of the state. Those rules were established in June 2014, including the following key provisions:

1) Collaborative agreements are written agreements between licensed dentists and licensed dental hygienists. Under this agreement, the dental hygienist can provide prophylaxis, fluoride treatments, sealants, dental hygiene instruction, and assessment of a patient's need for further dental treatment. Such services must be provided in a public setting but can be provided without the supervision or presence of the dentist or the prior examination of the patient by the dentist.

2) Public settings are defined as: adult long-term care facilities; charitable health clinics; community health centers, county jails, facilities serving developmentally disabled persons; Head Start programs; local health units; school in rural counties; and state correctional institutions. Services may also be provided in the homes of homebound patients who qualify for in-home medical assistance.

3) Consulting dentists and collaborative care dental hygienists must consult with the Office of Oral Health in the Arkansas Department of Health for permission to practice collaborative care. That permission must be confirmed annually.

4) The Office of Oral Health is required to develop and maintain a list of communities and/or rural areas prioritized as to need for dental services, so that collaborative services can be directed to those areas in greatest need. Prioritization is based on access to care and limited to public settings (i.e., those settings itemized above). Schools are to be prioritized according to two factors: a low full-time dentist to population ratio and the percentage of students participating in the federal school lunch program (i.e., free and reduced meal

program) of the school or school district. Six tiers are specified, ranging from 50% of students receiving free and reduced lunches to 90% of students receiving free or reduced lunches. No school in a tier can be deemed eligible for services until all schools in higher tiers have received or declined services.

This report classifies schools into the six tiers as specified by the Rules and by the ratio of full-time dentists to population in the county served by the school. Data are presented in both tabular and graphic form.

Methods and Data Sources

Data were derived from two sources. First, data regarding the dentist-to-population ratio in each county were obtained from the Arkansas Department of Health's 2012 Workforce Report. Second, data regarding the percentage of students receiving free or reduced lunches in each school for the 2013-2014 school year were obtained from the Arkansas Department of Education's website. The physical address of each school was also obtained from that website, so that schools could be mapped accurately.

Because the rules and regulations speak specifically to the provision of dental sealants and fluoride treatments, and with the approval of the Office of Oral Health, schools were limited to those serving students in the 2nd through 6th grades.

A database was created including the school's name, city, county, dentist-to-population ratio, percentage of students receiving free/reduced price lunches, tier designation [levels 1 (highest) through 6 (lowest)], and ratio level [levels 1 (highest) through 5 (lowest)]. The database can be sorted to facilitate future prioritization, should rules or guidance change.

Tables have been produced to characterize schools by tier designation and ratio level. In addition, maps have been produced for each tier to depict the location of schools within counties, which are color-coded according to ratio level.

Maps

Tier 1: Schools with 90% or more of students receiving free/reduced price lunches

Tier 2: Schools with 75% or more of students receiving free/reduced price lunches

Tier 3: Schools with 70% or more of students receiving free/reduced price lunches

Tier 4: Schools with 60% or more of students receiving free/reduced price lunches

Tier 5: Schools with 50% or more of students receiving free/reduced price lunches

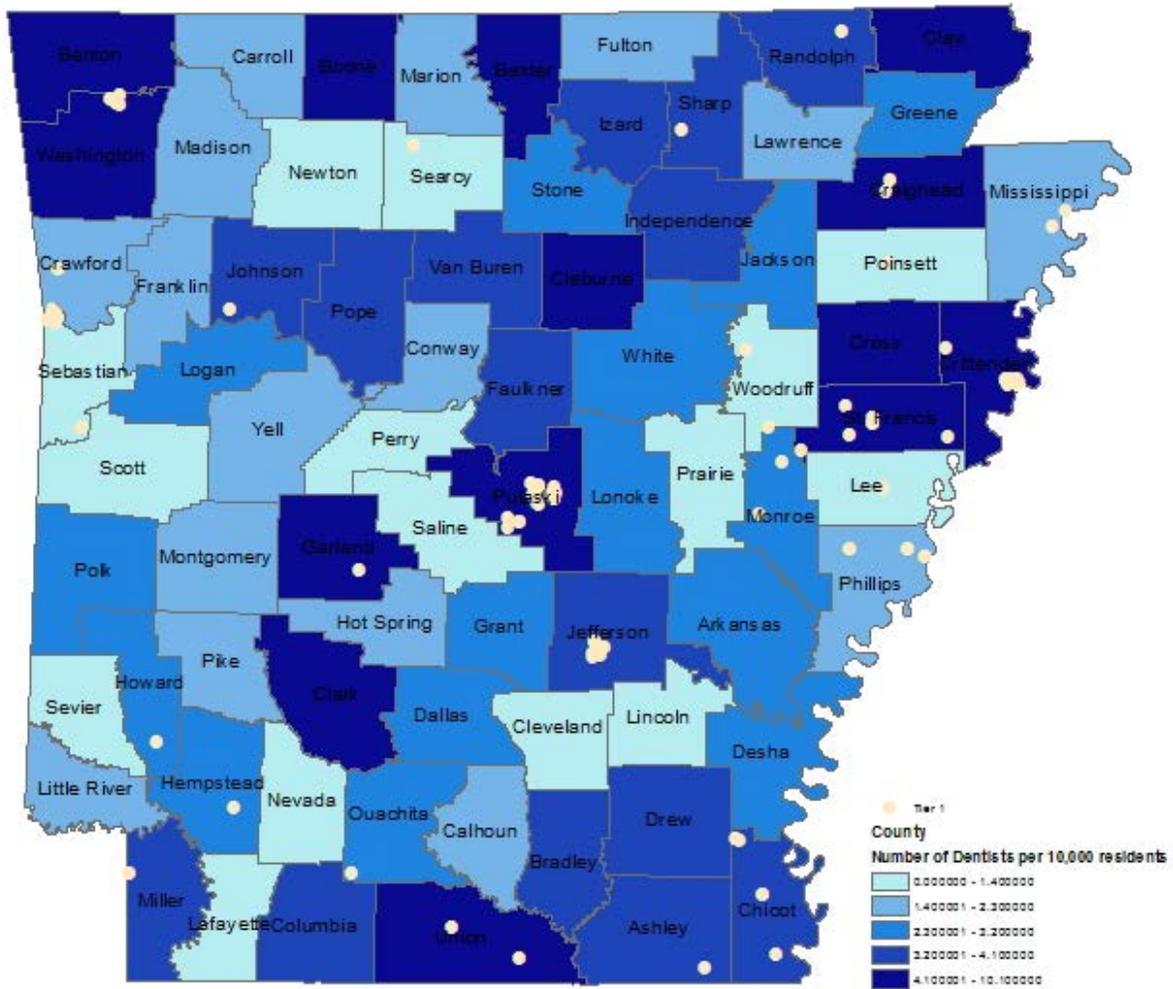

Tier 6: Schools with less than 50% of students receiving free/reduced price lunches

Interpreting the tables: Within each table, schools are listed by ratio level, with schools in the highest risk counties (i.e., those with the lowest ratios of dentists to population) listed first. Within each ratio level, schools are listed by the percentage of students receiving free/reduced price lunches (in ascending order). Thus, the reader can identify those schools that are located in areas with the fewest dentists and then identify those schools with the greatest students in need (with regard to family income).

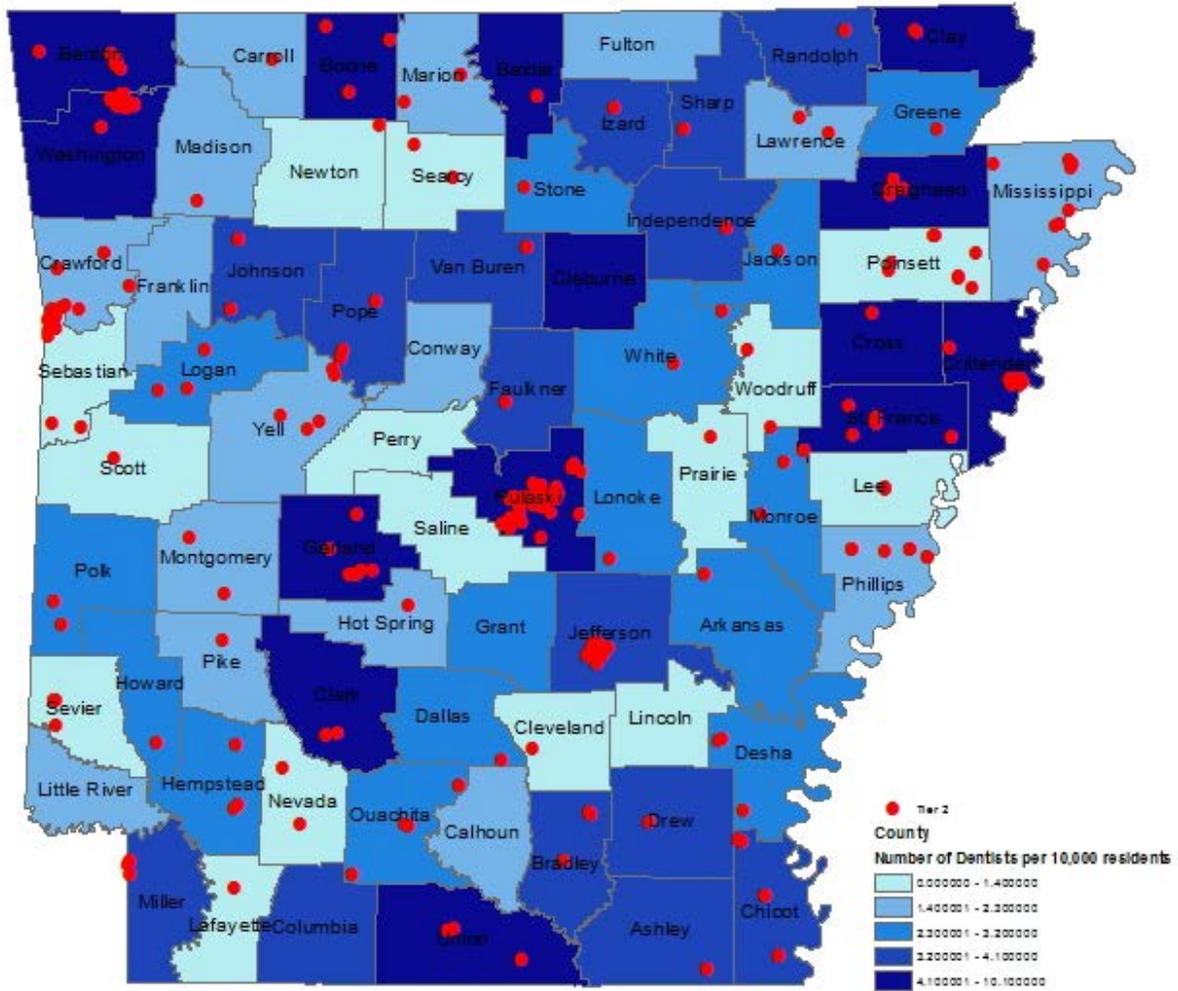

Interpreting the maps: In each map, lighter colors indicate fewer dentists per population (lower dentist-to-population ratio) and, thus, greater need according to the Rules and Regulations. Schools meeting the tier criterion (specified in the title of the map) are indicated with dots.

It should be noted that there is substantial overlap among the maps and among the tables. Schools in Tier 1 (those with 90% or more of students receiving free/reduced price lunches) are also included in Tiers 2, 3, 4, and 5, as their percentage of students receiving free/reduced price lunches exceeds the minimum criteria for those tiers. Similarly, schools in Tier 2 are also included in Tiers 3, 4, and 5; schools in Tier 3 are also included in Tiers 4 and 5; and schools in Tier 4 are also included in Tier 5. Thus, the map and table for Tier 5 includes the greatest number of eligible schools.

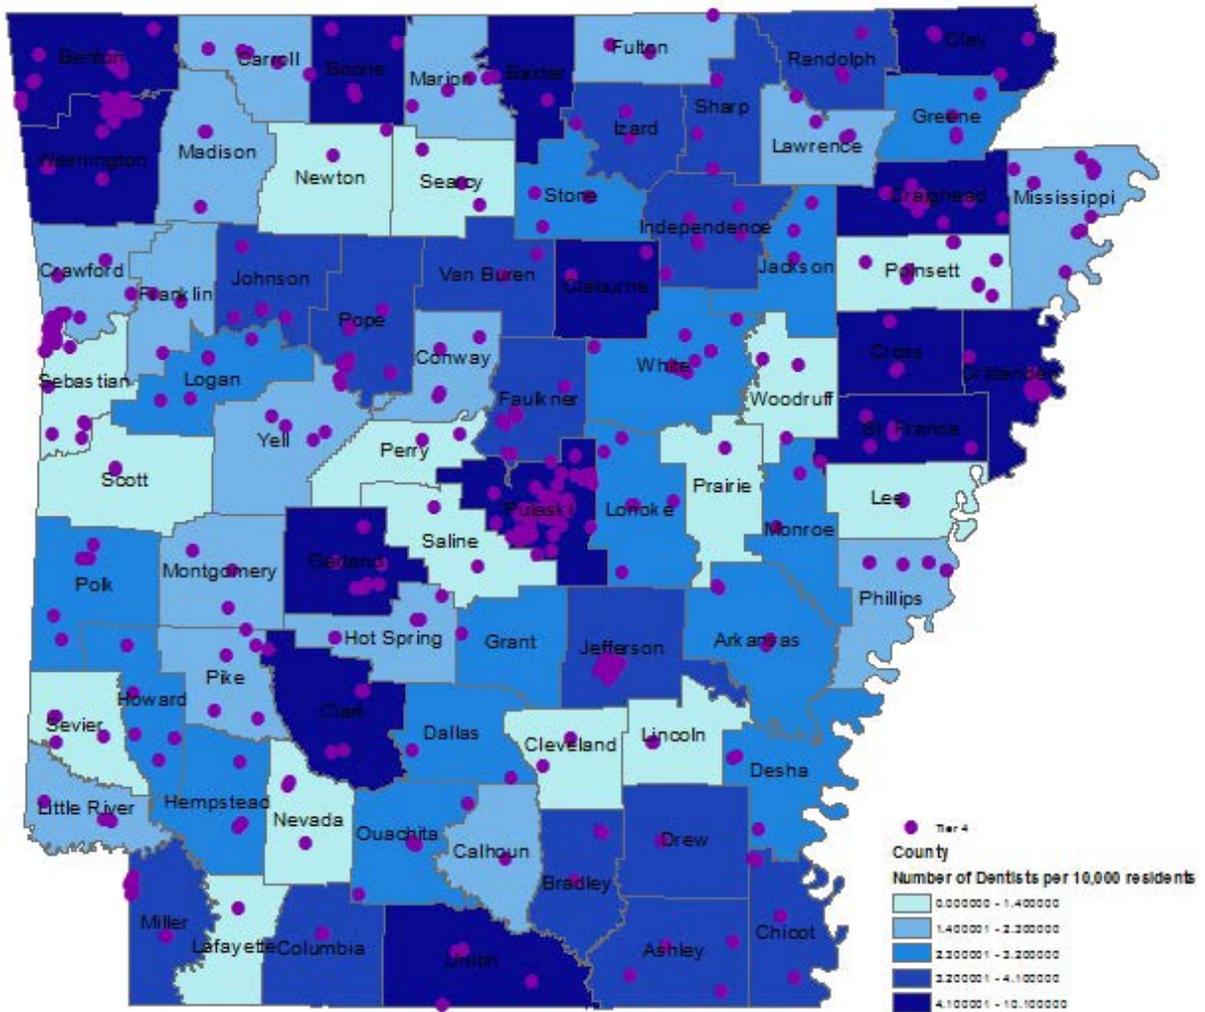

Tier 1: Schools with 90% or more of students receiving free/reduced price lunches

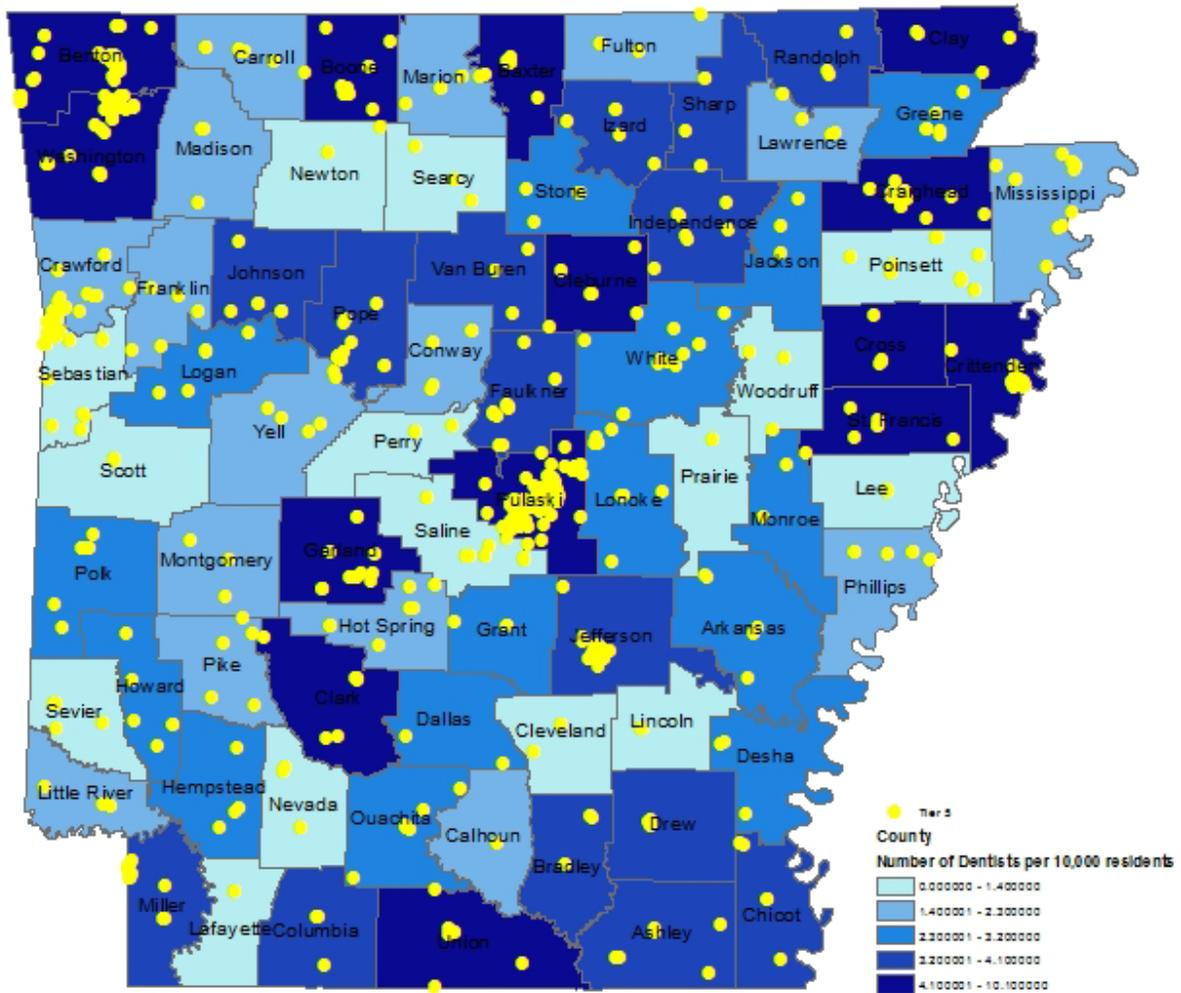

Tier 2: Schools with 75% or more of students receiving free/reduced price lunches

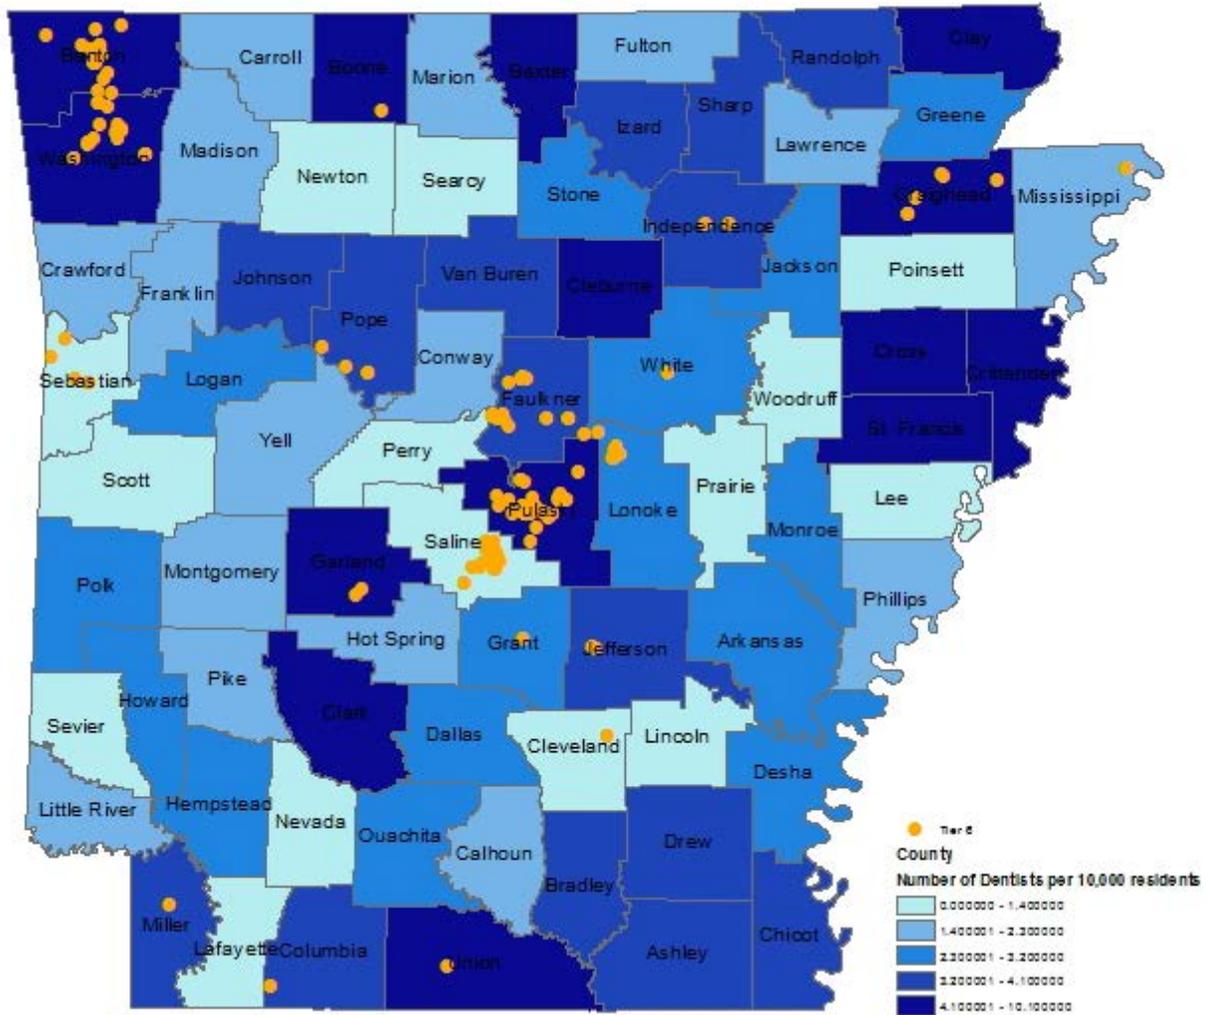

Tier 4: Schools with 60% or more of students receiving free/reduced price lunches

Tier 5: Schools with 50% or more of students receiving free/reduced price lunches

Tier 6: Schools with less than 50% of students receiving free/reduced price lunches
