November 29, 2022

During flu season, the Arkansas Department of Health (ADH) produces a Weekly Influenza Report for clinicians. The report provides information on flu activity in the state. The report also compares influenza-like-illness (ILI) in Arkansas to activity in the U.S. ADH receives reports of only a fraction of flu cases since it only requires reports of hospitalizations, deaths, and outbreaks. Therefore, it is important to understand that the information in the weekly update is representative of the timing and location of activity, but it does not reflect the overall burden of disease. It is presumed that there are many more people actually affected than the report shows. Clinicians and policy makers may find the report helpful in terms of communicating to colleagues and patients about the current status of the flu season.

Report Key Points:

- For Week 47, Arkansas reported “Very High” or 12 out of 13 for Influenza-Like-Illness (ILI) activity level indicator determined by data reported to ILINet.
- Since October 2, 2022, over 11,900 positive influenza tests have been reported to the ADH by health care providers. **Please note that reported cases reflect only a portion of the actual numbers of flu cases in the state.**
- Among flu antigen tests this season that can distinguish between influenza A and B virus types in Arkansas, 91 percent were influenza A, and 9 percent were influenza B.
- Over 8 percent of patients visiting emergency rooms this week were there for ILI (Syndromic Surveillance), and 8 percent of outpatient visits were for ILI (ILINet sentinel providers).
- No school absenteeism rate last week among public schools due to the holidays.
- Arkansas reported 30 influenza-related deaths this flu season, including 1 pediatric death.
- CDC estimates so far this season, there have been at least 6.2 million illnesses, 53,000 hospitalizations, and 2,900 deaths from flu.
- Thirteen (13) nursing homes have reported influenza outbreaks this season.
- Nationally, the proportion of deaths reported to the National Center for Health Statistics attributed to pneumonia and influenza (P&I) is above the epidemic threshold this week.

You can report flu year-round and view the weekly influenza report during the influenza season at: <http://www.healthy.arkansas.gov/programs-services/topics/influenza>. You can also access the reporting website directly at: <https://FluReport.ADH.Arkansas.gov>.

2022-2023 Influenza Outbreak Response/Epi Report (Week 47: 11/20/2022 – 11/26/2022)

Death Report for Week 47

- Deaths from all causes: 507
- Deaths due to Pneumonia: 52
- PCR confirmed Flu Deaths: 4
- Death Certificate or Flu Antigen only: 7

Cumulative Flu Deaths since 10/02/2022

- PCR confirmed Flu deaths: 11
- Death Certificate or Antigen only: 19
- Cumulative Flu deaths: 30

Total Flu-Related Hospital Admissions

- Cumulative: 468
- Week ending 11/26/2022: 164

Weekly Arkansas ILI Intensity Level Reported by Sentinel Providers

PCR Lab Confirmed Influenza Cases

- Total Cases since 10/02/2022: 2,050
- Week ending 11/26/2022: 554

Reported cases reflect only a portion of the actual numbers of flu cases in the state.

PCR Tests	Week 47	Cumulative Cases Since 10/02/2022
A+	547	1,970
B+	4	26
Both A and B	2	16
B/Victoria	0	0
B/ Yamagata	0	0
H1N1+	0	29
H3+	1	9
Unsubtypeable	0	0
Total	554	2,050

PCR Confirmed Influenza Cases since 10/02/2022

Age Groups	PCR+	Hospitalized	Deaths
0-4 yr.	216	4	0
5-17 yr.	657	8	1
18-24 yr.	119	4	0
25-44 yr.	399	31	1
45-64 yr.	384	85	3
>= 65 yr.	274	134	6
Unknown	1	0	0
Total	2,050	266	11

School Absenteeism*

Week Ending: 11/26/2022

- Percent Absent: No Report, Holidays
- Previous Week: 8.55

* Average daily absenteeism for all public schools during this reporting week.

ER Visits (Syndromic Surveillance)

- **Week Ending: 11/26/2022**
Weighted Average: 8.13%
– Total Visits: 21,997
– Visits with ILI: 1,788
- **Previous Week**
Weighted Average: 6.50%
– Total Visits: 20,145
– Visits with ILI: 1,311
