During flu season, the Arkansas Department of Health (ADH) produces a Weekly Influenza Report for clinicians. The report provides information on flu activity in the state. The report also compares influenza-like-illness (ILI) in Arkansas to activity in the U.S. ADH receives reports of only a fraction of flu cases since it only requires reports of hospitalizations, deaths, and outbreaks. Therefore, it is important to understand that the information in the weekly update is representative of the timing and location of activity, but it does not reflect the overall burden of disease. It is presumed that there are many more people actually affected than the report shows. Clinicians and policy makers may find the report helpful in terms of communicating to colleagues and patients about the current status of the flu season.

**Report Key Points:**

- For Week 42, Arkansas reported “Minimal” or 1 out of 13 for Influenza-Like-Illness (ILI) activity level indicator determined by data reported to ILINet.
- Since September 27, 2020, 68 positive influenza tests have been reported to the ADH online database by health care providers. **Please note that reported cases reflect only a portion of the actual numbers of flu cases in the state.**
- Among flu antigen tests this season that can distinguish between influenza A and B virus types, 63 percent were influenza A, and 37 percent were influenza B.
- About 1 percent of patients visiting emergency rooms this week were there for ILI (Syndromic Surveillance). Less than 1 percent of outpatient visits were for ILI (ILINet sentinel providers).
- The average school absenteeism rate last week was 6.1 percent among public schools.
- To date, no influenza-related deaths have been reported in Arkansas this flu season,
- No nursing homes have reported influenza outbreaks this season.
- Nationally, the proportion of deaths reported to the National Center for Health Statistics attributed to pneumonia and influenza (P&I) is above the epidemic threshold this week.

You can report flu year-round and view the weekly influenza report during the influenza season at: [http://www.healthy.arkansas.gov/programs-services/topics/influenza](http://www.healthy.arkansas.gov/programs-services/topics/influenza). You can also access the reporting website directly at: [https://FluReport.ADH.Arkansas.gov](https://FluReport.ADH.Arkansas.gov).

Death Report for Week 42
- Deaths from all causes: 753
- Deaths due to Pneumonia: 111
- PCR confirmed Flu Deaths: 0
- Death Certificate or Flu Antigen only: 0

Cumulative Flu Deaths since 09/27/2020
- PCR confirmed Flu deaths: 0
- Death Certificate or Antigen only: 0
- Cumulative Flu deaths: 0

Total Flu-Related Hospital Admissions
- PCR Confirmed:
  - Cumulative: 0
  - Week ending 10/17/2020: 0
- Antigen Positive:
  - Cumulative: 5
  - Week ending 10/17/2020: 3
