

Student medications

As the end of the school year is near it may be helpful to contact the student's family/legal guardian prior to the end of school and establish an appointment for the transfer of the student medications.

If medications are left in the school possession at the end of the year, the school may wish to review disposal guidance from DEA and FDA.

The Arkansas Department of Health is no longer the receiving entity for unwanted medications.

Here are some governmental links that may be helpful to you.
